Criteria and Procedures for allowing a student to satisfy a general elective course requirement for purposes of admission to the California State University by completing a high school career technical education course.

1) The first criterion is that a course to be considered under 66205.8 should be evaluated within the confines of existing CSU/UC shared intersegmentally appropriate a-g criteria (e.g., area “g”; http://www.ucop.edu/a-gGuide/ag/a-g/elective.html).
   a. In the case that a course to be considered under 66205.8 falls outside of the range of courses potentially considered as part of the shared intersegmental (UC/CSU) criteria under (1) (cf., http://www.ucop.edu/a-gGuide/ag/a-g/purpose.html), The course to be considered under 66205.8 must address a domain associated with a program of study offered by the CSU (this resolves Education Code 66205.8(c)).
   b. The CSU (via ASCSU recommendation) may adopt CSU additional standards in addition to those at http://www.ucop.edu/a-gGuide/ag/a-g/elective.html for those domains of study outside the confines of shared intersegmental (UC/CSU) a-g criteria.
      i. Where such standards exist, they shall be used to determine eligibility.
      ii. If no such standards exist, a course to be considered under 66205.8 may be evaluated in the context of the most proximal standards to the course content and structure in addition to those at http://www.ucop.edu/a-gGuide/ag/a-g/elective.html.
1. Although appropriate staff may perform an initial screening, any
resubmitted application should be considered by a subject matter expert
(or experts) approved by the ASCSU, including faculty of the CSU as
appointed by the ASCSU.
