The California State University
Statistical Abstract

Office of the Chancellor • 401 Golden Shore • Long Beach, CA • 90802-4210

CSU

The California State University

Foreword

The Statistical Abstract, first published in 1971, is compiled by Analytic Studies, the institutional research unit of the California State University (CSU) Office of the Chancellor. The Abstract presents statistical information on all aspects of the CSU. Its aim is to provide a comprehensive historical view of the system and its member campuses. The last Abstract, published in June of 2003, describes the status of the CSU to July 2002. The current version brings the Abstract series up to date with coverage to July 2003.

As in the prior year, the Statistical Abstract to July 2003 is available only as an electronic document. CSU campuses will be sent the Statistical Abstract on CD. Others can view or download the document via the Worldwide Web at www.calstate.edu/AS.

Information pertaining to enrollment, applications, educational achievements and progress, and some areas of instruction are produced by the Analytic Studies Office, Academic Research Division. Analytic Studies is also responsible for coordinating design and production of the Abstract. Other divisions within the Chancellor's Office contributing to the preparation of the Abstract are: Academic Affairs, Business and Finance, Extended Education, Human Resources, Information Technology Services, International Programs, and Capital Planning, Design and Construction.

The Abstract is divided into seven major sections: Systemwide and Campus Enrollments, Student Profile, New Students, Academic and Support Programs, Education Access and Outcomes, Instruction, and Resources. Each section and/or subsection begins with introductory narratives, which describe the information presented on subsequent pages. These opening remarks are generally followed by one or more graphs that highlight issues or trends of particular importance to that area of university activity.

The California State University

The California State University was formed in 1961, when the 15 existing state colleges were organized as a system under the supervision of an appointed Board of Trustees and a systemwide Chancellor. The California State University and Colleges became the official name of the system in 1972. In 1982 this name was changed to the California State University.

As of college year 2002-2003, The California State University system consists of 23 campuses with a fall 2002 enrollment of 406,515 students and teaching force of slightly more than 22,000 faculty. It is one of the three publicly supported segments of higher education in the state. San Jose State University, originally established as a normal school devoted to the preparation of public school teachers, is the oldest campus in the system. Founded in 1857, it is the first institution of public higher education in California. CSU Channel Islands, the newest campus in the system, began accepting students in fall 2002 and will welcome its first freshman class in fall 2003.

As the largest senior system of higher education in the nation, the CSU offers more than 1,600 bachelor's and master's degree programs in some 240 different subject areas, a variety of education credential programs, and a fully accredited statewide nursing curriculum.

Of the current 23 campuses, 22 are accredited by the Western Association of Schools and Colleges. The newest campus, CSU Channel Islands, is in the process of earning WASC accreditation. In addition, CSU campuses have 185 curricular programs accredited by national professional accrediting agencies.

Achieving academic excellence is a continuing goal of the system. Through its distinguished faculty, whose primary responsibility is teaching, the CSU sponsors and supports innovative educational programs and dedication to the highest ideals surrounding postsecondary education. While each campus has its own unique curricular and geographic character, all offer undergraduate and graduate instruction for professional and occupational goals as well as broad liberal education. All campuses require for graduation a basic program of "General Education-Breadth Requirements" regardless of the type of bachelor's degree or major field selected by the student.

The CSU confers over 60,000 degrees annually, which represents about 50 percent of all bachelor's degrees and 30 percent of the master's degrees granted by California colleges and universities. Since 1961, more than 2 million degrees have been conferred by the CSU system.

Acknowledgments

Preparation of the Statistical Abstract requires the efforts and cooperation of many individuals. Without the combined assistance of those mentioned below, publication of this comprehensive digest on the California State University would be impossible. Their contributions and perseverance are valued.

Organization and presentation of information, as well as development of the statistical graphs and preparation of the final draft were the responsibility of Harold Creech. Other Analytic Studies staff also made important contributions to this edition: Waddell Herron supplied data on applications for enrollment; James Ssemakula and Monica Walia updated the continuation and persistence data; and Michel Baker provided invaluable assistance in formatting the Abstract CD to achieve a user-friendly tool to replace the printed version of the Abstract.

Other Chancellor's Office staff who provided key information and analysis for this volume are listed below. Their assistance is gratefully acknowledged.

Dennis Armstrong, Ph.D.
