**Student Profile**

## Introduction

The Student Profile section provides a historical synopsis of the California State University student population regarding the following dimensions: total and full-time enrollments in the public segments of California higher education (the California State University, the University of California, and the California Community Colleges); student enrollments by enrollment status (e.g., first-time, transfers, continuing) and student level; and descriptive statistics on the individual characteristics of CSU students, starting with historical data on enrollment and average units attempted by gender. Age and gender distributions are also presented for postbaccalaureate and graduate students, undergraduate students, and total fall enrollments. Enrollments by ethnic group and campus, ethnic group by student level, and a history of ethnic group enrollments by level are also displayed.

Included with individual characteristics are historical summaries of enrollments by residence status and place of residence, as well as by citizenship status and country of citizenship.

Unless otherwise noted, CSU Summer Arts, CalStateTEACH, and International Programs are not included in enrollment data. Likewise, prior to fall 1998, the CSU Statewide Nursing Program figures are not included in enrollment data. After fall 1998, however, the Statewide Nursing Program is included in the figures for CSU Dominguez Hills.

### Summary

#### *California Public Institutions*

Since 1960, the CSU has accounted for as little as 16.9 percent (fall 1981) and as much as 24.1 percent (fall 1968, 1969, and 1970) of students enrolled in California's publicly financed institutions of higher education. Since 1990, the CSU has enrolled an average of roughly 18 percent of all students attending public institutions of higher learning in the state. In fall 2004, CSU enrollment accounted for 18.1 percent of all students in California public colleges and universities.

Although total enrollments were down in fall 2004 when compared to a year ago, full-time higher education enrollment for the state reached a thirty-year high. However, this growth was not uniform. Full-time enrollment was up at the community colleges, but down at the University of California and the California State University. In fact, CSU full-time enrollment declined for the first time in nearly ten years, from 291,030 in fall 2003 down to 288,813 in fall 2004.

#### *Student Level*

Since 1960, the distribution of CSU students by level has changed substantially. Part of the change is attributable to a shift in the mix of new students (e.g., first-time freshmen vs. undergraduate transfers), and part of the change is attributable to a shift in the mix of new and continuing students. Until 1992, the most significant change was the disproportionate growth of the senior class. From 1960 to 1970, the percentage of CSU students who were seniors rose from 18.6 percent to 25.1 percent. During this period, the freshman population declined from 21.2 percent to 14.4 percent, and the sophomore population declined from 14.1 percent to 10.5 percent. From 1970 to 1980, the proportion of seniors remained stable, the percentage of lower division students (freshmen and sophomores) grew, and the proportion of juniors declined. The proportion of seniors began to grow again in 1981. Between 1960 and 1993, seniors grew from 18.6 percent of CSU fall enrollment to 35 percent. After several years of decline, the proportion of seniors has consistently been about 30 percent since fall 2000. Freshman enrollment that was 21.2 percent in fall 1960 declined to 13.1 percent in fall 1993 and has since leveled off to about 18 percent. From fall 1960 to fall 1997, sophomores declined from 14.1 percent to 9.2 percent. However, the trend reversed in 1998 and sophomores now stand at 9.9 percent. Juniors rose to 28.7 percent in 1971 and have fluctuated in recent years as the proportion of continuing and returning students increased. In fall 2004, juniors accounted for nearly 23 percent of CSU enrollment. From 1960 to 1983, graduates made up 22 to 24 percent of fall CSU enrollment. Currently, 19.4 percent of CSU students have postbaccalaureate or graduate status, up from 18.9 percent in fall 1994, but down slightly from fall 2003.

#### *Part-Time and Full-Time Status*

The percentage of CSU students enrolled with a full-time unit load (defined as 12 or more student credit units per term at the undergraduate level and 9 or more student credit units per term at the graduate level) remained relatively stable from the early 1970s to the mid-1990s. From fall 1987 to fall 1991 the percentages of full-time and part-time students were fixed at 64 vs. 36 percent. For each of the last ten years, however, the percentage of full-timers has been about 70 percent.

#### *Gender*

By 1978, the proportion of CSU students who were women reached 50 percent, having increased gradually from 40 percent in 1960. Over the last 25 years, the proportion of women gradually increased. In fall 2004, women represented 59 percent of the CSU student body.

*Age*

The average age of CSU undergraduates was 22.9 years in 1967. The average age of undergraduates reached 24.1 in 1975 and has remained around 24 since then. In fall 2004, the average age of undergraduates was 23.4 years.

Graduate students, on average, are considerably older than their undergraduate counterparts. In fall 1967, for instance, the mean age for graduate students was 31.3, an eight-year difference. The average age of graduate students fell to a low of 29.9 in 1971, increasing steadily to 33.7 in fall 1990. The average age of graduate students has not changed much since then and stands at 33.3 in fall 2004.

Currently, the mean and median ages of all CSU students are 25.4 and 23, respectively. The mean age of all students has varied only slightly over the past 15 years; for example, in fall 1988 it was 26 years. During that same time (since fall 1988), the median age of all students has been 23-24 years. All these data suggest there was very little increase in the number of older students entering the CSU at both the undergraduate and graduate levels.

*Nonwhite Undergraduate Enrollment Trends*

In prior years, ethnic group percentages were computed using the total number of self-identified students as the denominator. The resulting proportions excluded students of unknown ethnic identity and students identified as nonresident aliens. Beginning this year, the formula for calculating ethnic group proportions defines the denominator as the sum of all students (i.e., students that self-identify their ethnicity, students of unknown ethnicity, plus nonresident aliens). Now ethnic group percentages for CSU students conform to federal reporting practices. The new formula, of course, produces lower ethnic group percentages than the old formula.

Historical data on the racial/ethnic composition of the CSU's undergraduate enrollment reveal a substantial increase in the percentage of nonwhite students across all enrollment categories. For instance, among those who self-identified their racial/ethnic status from fall 1987 to fall 2004, students from nonwhite groups grew from 30.3 percent of total undergraduate enrollment to 47.4 percent.

In general, both the number and proportion of undergraduate students from minority groups increased since 1987. African American students grew from 14,499 in fall 1987 (5 percent of total undergraduate enrollment) to 18,416 in fall 2004 (6 percent). American Indians, a group whose enrollment has fluctuated in recent years, declined slightly from 2,713 to 2,381. Asian American students grew from 30,414 (11 percent) in fall 1987 to 42,156 (13 percent) in fall 2004. The number of Filipino students more than doubled, rising from 6,959 in fall 1987 to 15,322 in fall 2004. Nearly one-quarter of total undergraduate enrollment consisted of Mexican American and

Other Latino students in fall 2004; their numbers revealed a striking increase from 27,309 in fall 1987 to 70,899. Pacific Islanders grew 75 percent since 1987, increasing from 1,111 to 1,944 undergraduate students.

In summary, African American, Asian American, Filipino, Mexican American, Other Latino, and Pacific Islander students have increased their numbers in the CSU during the past 15 years. Conversely, the number and proportion of White, non-Latinos has declined 30 percent in this period (down to 116,675 from 166,561).

*Origin of Students*

In this section, residence is defined by fee status. California residents pay resident fees. Out-of-state students pay nonresident fees. Students who pay nonresident fees fall into three categories: those from other U.S. states, U.S. possessions, or from foreign countries. Resident and nonresident students are listed differently in the accompanying tables.

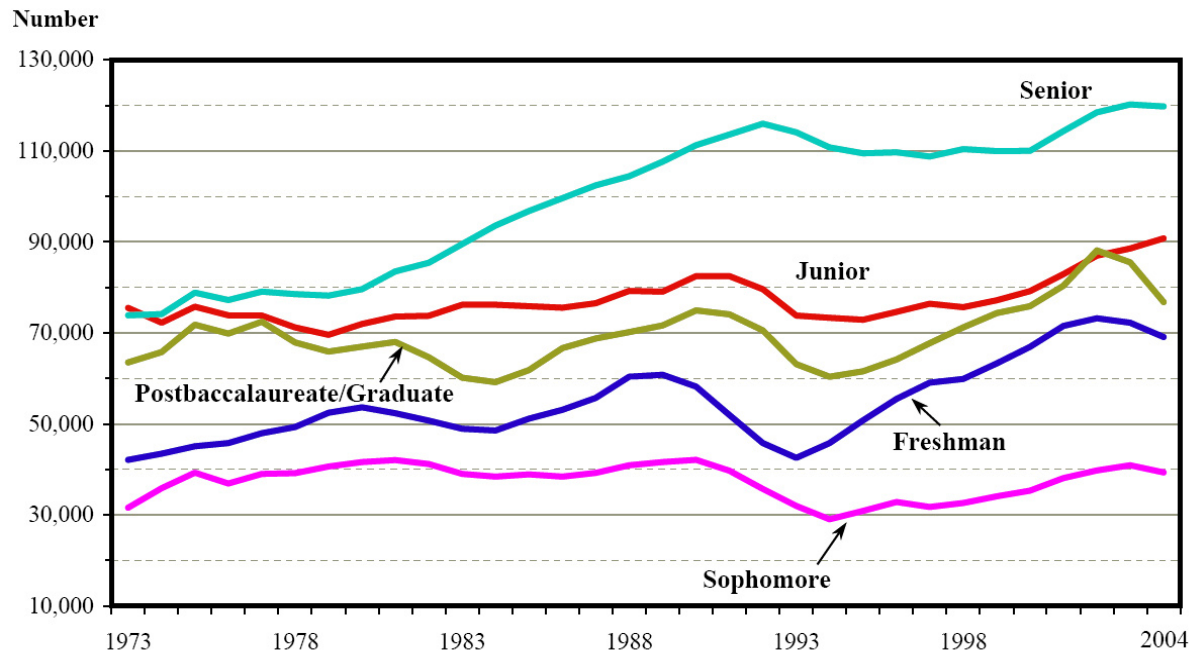

- Students who paid resident fees are listed by the California counties in which they resided at the time of their application to the CSU.
- Students who paid nonresident fees are listed by the U.S. state, U.S. possession, or foreign country in which they resided at the time of application.

The overwhelming majority of CSU students are California residents. In fall 2004, 384,949 (97 percent of the 395,825 students enrolled) were defined as residents for fee-paying purposes. Of the remainder, 3,212 were from other U.S. states, 18 were from U.S. possessions, and 7,646 were from a foreign country.

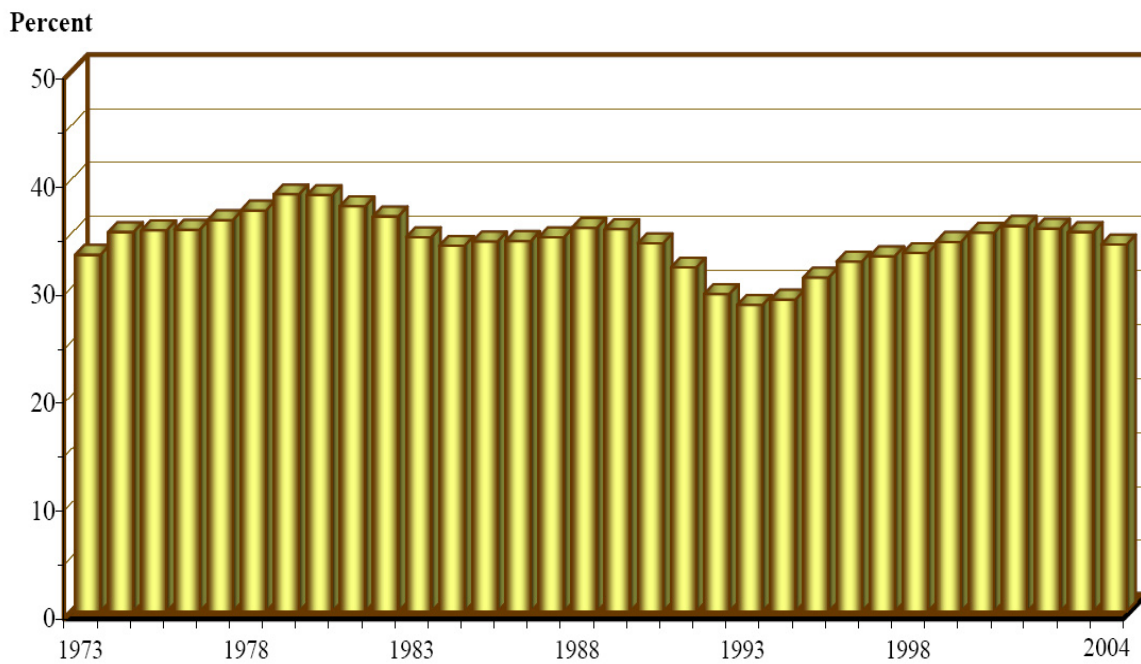

Students are also defined by citizenship status. In some cases, noncitizens are listed by their country of origin. Here it is important to remember that citizenship alone does not determine fee status.

Noncitizen enrollment in the CSU (e.g., visa students, resident aliens, and refugees) grew steadily from 1987 to 1997. The 1997 enrollment of 56,530 represented an increase of 34 percent in ten years. Since then, noncitizen enrollment has been declining. The 43,237 noncitizens enrolled in fall 2004 represent a decline of 23 percent in seven years. Noncitizens constituted about 11 percent of total fall 2004 CSU enrollment, down from a high of 16 percent in 1997. Representing about two-thirds of the noncitizen enrollment, resident alien enrollment declined from 42,593 students in fall 1997 to 26,669 in fall 2004. The decline in the last two years alone was over 25 percent for these students (down from 35,755 in fall 2002). Visa students were the noncitizen group evidencing substantial growth since fall 1997. There were 15,279 Visa students enrolled in fall 2004 compared to 12,036 in 1997, an increase of 27 percent.
