

About the Center for Usability in Design and Accessibility (CUDA):

CUDA specializes in usability and accessibility. It is an official research, training and service center on the campus of CSU, Long Beach. CUDA's is to help evaluate the usability and accessibility of technology tools and products before costly investments of time, money and resources are made.

CUDA Providing Support Since 1996

CUDA has provided research, training, instructional resources and methodologies for usability and accessibility evaluation for

academic staff, faculty, government agencies and industry. Here's some examples of how CUDA can help: determine how easy your portal or website is to use, determine whether it is effective in achieving end user goals, evaluate and test the accessibility of any content or web-based application, and access a digital library of related resources.

Benefits of CUDA:

- Utilize a laboratory environment for conducting user testing with video
- Conducts expert usability evaluation using proven practices
- Provides resource library and guidelines on accessibility and usability
- Conducts usability and accessibility studies
- Provides expert human factor consulting services
- Provides access to a FREE digital library of resources concerning assistive technologies, accessibility products, accessibility evaluation methods and training materials through Accessibility Resource Finder
