June 16, 2015

Dr. Soraya M. Coley, President
California State Polytechnic University, Pomona
3801 West Temple Avenue
Pomona, CA 91768

Dear Dr. Coley:

Subject: Audit Report 15-10, Bronco Recreation and Intramural Complex,
California State Polytechnic University, Pomona

We have completed an audit of the Bronco Recreation and Intramural Complex construction project as part of our 2015 Audit Plan, and the final report is attached for your reference. The audit was conducted in accordance with the Institute of Internal Auditors’ International Standards for the Professional Practice of Internal Auditing.

There were no reportable observations revealed during the review. The final audit report has been posted to the Office of Audit and Advisory Services’ website.

I wish to express my appreciation for the cooperation extended by the campus personnel over the course of this review.

Sincerely,

Larry Mandel
Vice Chancellor and Chief Audit Officer

c: Timothy P. White, Chancellor
CONSTRUCTION

California State Polytechnic University, Pomona

Bronco Recreation and Intramural Complex

Audit Report 15-10
June 16, 2015
EXECUTIVE SUMMARY

OBJECTIVE

The objectives of the audit were to ascertain the effectiveness of construction management policies and procedures related to the fiscal, operational, and administrative controls over construction activities, determine the adequacy of internal controls and processes, identify cost recovery opportunities, and ensure compliance with relevant governmental regulations, Trustee policy, Office of the Chancellor directives, and campus procedures.

CONCLUSION

Based upon the results of the work performed within the scope of the audit, the fiscal, operational, and administrative controls in effect for the Bronco Recreation and Intramural Complex (BRIC) project were sufficient to meet the objectives of this audit. There were no reportable observations revealed during the review.
GENERAL INFORMATION

BACKGROUND

In March 2011, the Board of Trustees (BOT) approved schematic plans for the BRIC project at a cost of $56,600,000, with funding from systemwide revenue bonds, to be repaid from an increase in student fees that was approved in August 2010.

In January 2010, the campus executed an agreement with the architectural firm LPA, Inc. for services related and incidental to the design and construction of the BRIC project. It also executed an agreement with the construction manager (CM), C.W. Driver, Inc., for pre-construction services that included design and bid phase services. In August 2012, the campus executed a guaranteed maximum price (GMP) agreement with the CM for construction phase services at a construction cost of $44,530,230, and issued a Notice to Proceed on August 20, 2012, with a completion date of August 18, 2014. The State Fire Marshal granted a Certificate of Occupancy on September 15, 2014, and the campus filed a Notice of Completion on January 14, 2015.

The BRIC project is a 165,000-square-foot recreation center at the south quadrant of the California State Polytechnic University, Pomona (Cal Poly Pomona) campus. The Associated Students, Inc. (ASI) organization operates the facility through its campus recreation department. In the 2008/09 academic year, the ASI senate approved the BRIC as a key initiative in its 2009-2014 strategic plan. The new three-story facility includes a gymnasium, a multi-activity court gymnasium, and an elevated jogging track, as well as a weight and fitness room, a rock-climbing wall, recreation and lap pools, sports club spaces, multipurpose rooms, a wellness center, a social lounge, a juice bar, men’s and women’s locker rooms, and ASI administrative offices. The project is seeking a Leadership in Energy and Environmental Design (LEED) gold rating. LEED is a third-party certification program begun in 1999 by the United States Green Building Council and is a nationally accepted benchmark for the sustainable “green” design, construction, and operation of buildings.

The Cal Poly Pomona campus managed the BRIC project, and it chose the Construction Manager at Risk (CM at Risk) with GMP delivery method. In this method, a construction management firm chosen by a competitive bidding process provides all or significant portions of design and construction administrative services and takes part in establishing the GMP. The CM at Risk acts as the general contractor during construction, assumes the risk of subcontracting the work, and guarantees completion of the project. The liability for the success in completing the project on time and in budget lies with the CM, and not with the university. Further, there is a potential for cost savings should the project be completed below the GMP.

Campus presidents have delegated authority to manage directly state and non-state funded capital outlay projects. The chancellor’s office issues this delegated authority to the campus subject to its compliance with the capital outlay certification procedure. To comply, the campus submits a request for Delegation of Capital Outlay Management Authority to the Certification Review Board (CRB) for review. Then the executive vice chancellor and chief financial officer in the chancellor’s office must approve the request. The campus president is responsible for ensuring that he or she exercises delegated authority in compliance with applicable statutes, regulations, and BOT policies; the campus manages capital projects via a
process consistent with the provisions of the Integrated California State University Administrative Manual (ICSUAM); and the campus has in place appropriate internal controls and processes to ensure that responsibilities are carried out in a manner consistent with the campus capital outlay management plan submitted with the request for delegated authority.

The aforementioned certification procedure includes submission of a capital outlay management plan, which defines the campus organizational and operational structure and expenditure authority and serves as the campus policies and procedures for the administration of construction activities. Updated plans are to be submitted when campus operational structure changes are made that impact the plan. Certification is continuous unless a Capital Planning, Design and Construction (CPDC) post-project performance review determines that problems were caused by campus negligence, in which case the CRB may recommend that the campus be placed on probation. The CRB may ultimately recommend that certification be withdrawn if identified operational/management deficiencies are not remedied.

For those campuses that are not certified, the chancellor’s office may execute a Memorandum of Delegation for a capital outlay project, which delegates administration, including construction management, to the campus. The CPDC construction management unit may also perform construction administration and management.

Each campus president (or designee) also has delegated authority to make all professional appointments relative to capital outlay projects and campus physical development in accordance with applicable statutes, regulations, BOT policies, and ICSUAM provisions; and must ensure the use of systemwide standardized architectural, engineering, and other professional appointment contract forms. Further, each construction administrator, project manager, inspector of record, campus representative, and design professional is required to use the CSU Construction Management Procedures Manual, which contains the CSU construction management policies and procedures that apply to a project.

SCOPE

We visited the Cal Poly Pomona campus and the offices of the CM and selected subcontractors from March 2, 2015, through April 3, 2015. Our audit and evaluation included the audit tests we considered necessary in determining whether fiscal, operational, and administrative controls for the BRIC project were in place and operative. At the time of our review, final contract reconciliation was pending.

Specifically, we reviewed and tested:

- Delegation of construction management authority.
- Review and approval of project design, budget, and funding.
- Professional services agreements and any extra services changes.
- Administration of the bid and award process.
- Contract execution and required contract bonds and insurance.
- Subcontractors and subcontractor substitutions.
- Contract and service agreement payment processing.
- Procurement of major equipment and materials.
- Performance of required inspections and tests.
- Review, approval, pricing, and tracking of change orders.
- Administration of subcontractor labor rates and associated burden.
- Construction management and overall project cost accounting and reporting.
- Construction allowances and contingency balances.

As a result of changing conditions and the degree of compliance with procedures, the effectiveness of controls changes over time. Specific limitations that may hinder the effectiveness of an otherwise adequate system of controls include, but are not limited to, resource constraints, faulty judgments, unintentional errors, circumvention by collusion, and management overrides. Establishing controls that would prevent all these limitations would not be cost-effective; moreover, an audit may not always detect these limitations.

Our testing and methodology was designed to provide a review of key operational and administrative controls, which included detailed testing on a limited number of CM and selected subcontractor transactions. Our review did not examine all aspects of financial controls or encompass all financial transactions for every contractor and subcontractor.

CRITERIA

Our audit was based upon standards as set forth in CSU Board of Trustee policies; Office of the Chancellor policies, letters, and directives; campus procedures; and other sound administrative practices. This audit was conducted in conformance with the Institute of Internal Auditors’ International Standards for the Professional Practice of Internal Auditing.

This review emphasized, but was not limited to, compliance with:

- Executive Order (EO) 672, Delegation of Capital Outlay Management Authority and Responsibility
- EO 666, Delegation of Professional Appointments Related to Capital Outlay Projects and Campus Physical Development
- ICSUAM §9000 through §9005, Capital Outlay and Public Works Contracts
- ICSUAM §9200 through §9212, Professional Services for Campus Development
- ICSUAM §9700 through §9843, Construction Management for Public Works Contracts
- CSU Administration of University Property - Equipment Procedures
- Contract General Conditions for CM at Risk with Guaranteed Maximum Price Projects
- Public Contract Code Chapter 2.5, CSU Contract Law
- Public Contract Code §4100 et seq., Subletting and Subcontracting Fair Practices Act
- Government Code §13402 and §13403
AUDIT TEAM

- Senior Director: Janice Mirza
- Senior Auditor: Jamarr Johnson
