RODNEY M. RIDEAU, BUDGET DIRECTOR

BUSINESS AND FINANCE, OFFICE OF BUDGET DEVELOPMENT (562)951-4560

February 11, 2003

TO: Chief Financial Officers

Code Memorandum: B 03-02-Amended

FROM: Rodney Rideau

Subject: **REVISED** 2003/04 Governor's Budget Allocations

CSU estimates for campus fee revenue increases based on a 7% increase in FTES enrollment and fee increases implemented in 2002/03 and 2003/04 were re-examined and an error was discovered in the Academic Year revenue calculation for 5 percent enrollment growth that affected the distribution of revenue for enrollment growth and fee rate increases for the 2003/04 fiscal year. Additionally, revenue associated with fee rate increases for the two percent enrollment growth inadvertently double-counted the revenue associated with enrollment growth only. Consequently, adjustments had to be made in the distribution of funds for CSU enrollment growth, funding New Space, and offsets for unallocated budget reductions. This memorandum provides the corrected copy of the charts originally provided for campus Governor's Budget allocations.

Most campuses will find that their General Fund budgets have increased slightly as a result of the revenue changes. However, campuses are cautioned that the amount of General Fund revenue for one-time enrollment growth has increased and, therefore, their permanent General Fund allocation for enrollment growth may have decreased. In the case of the 5% enrollment growth allocation the shift from permanent to one-time is generally around \$400,000; in the case of the 2% enrollment allocation the shift from permanent to one-time is in the neighborhood of \$100,000. Please reference Attachment F to determine if this is the case at your campus.

The text of the B 03-02 has been revised in this memorandum where necessary to reflect the changes that were required. Again, the adjustments made to the B 03-02 Governor's budget allocations are adjustments that would have been discovered as campuses calculated revenue for the fiscal year and do not materially impact the allocations made for either the budget reductions included in the Governor's Budget or the marginal cost expenditure increases and financial aid set-asides from enrollment growth revenue. These changes in revenue distribution more accurately reflect how the revenue will be collected across the three fiscal years: Winter/Spring 2003 in the 2002/03 fiscal, Summer and Fall 2003 and Winter/Spring 2003 for the 2003/04 fiscal year and Summer 2004 in the 2004/05 fiscal year. Campuses are reminded that the Governor's Budget allocations do not reflect approximately \$13 million

in gross revenue that is expected in Summer 2004 as a result of the fee rate increase assumed for 2003/04. After the one-third set-aside for financial aid, campuses can still expect approximately \$8 million to offset budget reductions or fund unfunded mandatory costs.

As before, information provided in this memorandum is based on the Governor's Budget proposal submitted to the Legislature on January 10, 2003 and should be used by campuses for budget planning purposes. It makes permanent the 3,008 FTES enrollment distributions that were made after the Fall 2002 census. It includes the identification of \$326.1 million in program and unallocated budget reductions proposed for the 2003/04 fiscal year. It identifies increases in State University Fee revenue from the mid-year 2002/03 rate increases and the rate increases assumed for 2003/04 in the Governor's Budget to offset unallocated and program budget reductions. One-third of the revenue from these fee rate increases have been identified and set-aside to increase the systemwide State University Grant pool.

The budget allocations include \$105.9 million in enrollment growth funding associated with the 16,057 FTES growth requested in the Board of Trustees' October budget, as well as \$45 million from the expectation in the Governor's Budget that CSU can continue to meet enrollment demand over the October board-requested targets. It is anticipated that CSU will be able to maintain its currently funded enrollment target of 321,132 FTES, increase by 16,057 FTES (5% growth), and provide additional student access to instructional services by up to two percent (6,744 FTES) above newly funded targets in fiscal year 2003/04. One-third of the gross marginal cost fee income from all enrollment growth allocations has been set aside to increase the SUG pool.

Revenue assumptions included in this memorandum assume the Board of Trustees will adopt increases in the State University Fee rate effective with the Fall 2003 term. Budget decisions in this memorandum reflect the fiscal year impact of the rate increases only.

If you have questions regarding the revised calculations, please contact me at your convenience.

The table below summarizes the expenditure increases detailed in this memorandum.

REVISED - 2003/04 Governor's Budget Allocations

Net Permanent Allocation for 2002/03 1% Enrollment Distribution		\$23,517,800
1-Percent (3,008 FTES) Enr. Growth General Fund Appropriation	\$19,516,000	
1-Percent Enrollment Growth Fee Income	\$5,232,000	
<i>Financial Aid Increase from 1% Enrollment Growth Income</i>	<i>(\$1,230,200)</i>	
Base Budget State General Fund Adjustments		\$77,763,000
2002/03 Retirement Cost Funding Increase	\$68,075,000	
2003/04 State Accounting Adjustments	\$9,688,000	
<hr/>		
2003/04 Budget Reductions		(\$326,072,000)
Unallocated Budget Cuts	(\$142,752,000)	
Program Budget Reductions	(\$183,320,000)	
<i>Mandatory Costs Obligations</i>	<i>(\$78,609,000)</i>	
<i>Permanent Reduction in Funding for Areas with Long-Term Need</i>	<i>(\$43,000,000)</i>	
<i>Total CSU Budget Reductions and Cost Obligations</i>	<u><i>(\$447,681,000)</i></u>	
Net Revenue available to fund Unallocated Budget cuts		\$135,886,000
Revenue from 2002/03 State University Fee Rate Increase	\$56,730,000	
Revenue from 2003/04 State University Fee Rate Increase	\$147,100,000	
<i>Financial Aid Offset for 2002/03 Rate Increase</i>	<i>(\$18,911,000)</i>	
<i>Financial Aid Offset for 2003/04 Rate Increase</i>	<i>(\$49,033,000)</i>	
Net Revenue available to offset Program Budget Reductions		\$2,066,000
Revenue from 2% Enrollment Growth for 2003/04 Rate Increase	\$3,098,000	
<i>Financial Aid Offset for 2003/04 Rate Increase</i>	<i>(\$1,032,000)</i>	
<hr/>		
State Enrollment Growth Funding		\$150,880,000
5 Percent Growth (16,057 FTES) over 2002/03 Targets	\$105,880,000	
Additional 2 Percent Growth (6,744 FTES) over 2002/03 Targets	\$45,000,000	
Net Enrollment Growth Fee Income		\$35,045,400
Revenue from 5 Percent Enrollment Growth	\$36,966,000	
Revenue from 2 Percent Enrollment Growth	\$12,868,000	
<i>Financial Aid Increase from 5% Enrollment Growth Income</i>	<i>(\$6,504,400)</i>	
<i>Financial Aid Increase from 2% Enrollment Growth Income</i>	<i>(\$2,738,100)</i>	
<i>New Space funded with 5% Enrollment Growth Income</i>	<i>(\$5,546,100)</i>	
State University Grant Financial Aid Increase		\$79,448,700
Fee Funded New Space		\$5,546,100

Governor's Budget adjustments are presented in seven attachments accompanying this memorandum:

Attachment A	Summary of 2003/04 Budget Allocations – General Fund
Attachment B	Summary of 2003/04 Budget Allocations – State University Fee Income
Attachment C	2003/04 Base Budget Adjustment for the 2002/03 One-Percent Enrollment Distribution (3,008 FTES)
Attachment D	2003/04 Base Budget General Fund Reductions
Attachment E	2003/04 Base Budget General Fund Expenditure Adjustments
Attachment F	2003/04 Budget Plan Enrollment Growth Expenditure Adjustments
Attachment G	Preliminary 2003/04 State University Grant Allocations

The expenditure allocations presented on these attachments reflect the following budget decisions:

1. FIRMS program budget reductions identified in the 2003/04 Governor's Budget for Student Services, Academic Support and Institutional Support, as well as the unallocated reductions across CSU programs, will be allocated on the basis of the campuses and the Chancellor's Office pro-rata share of the 2002/03 applicable General Fund base budget. The pro-rata percentage share will be based on the Final Budget General Fund allocations reflected in B 02-04 plus the General Fund supplement campuses received for the additional one percent enrollment growth distribution made in B 02-06. The pro-rata calculation excludes General Fund support for the Summer Arts program and Systemwide Provisions, which includes funding for CSU services that have already been specifically reduced in the 2003/04 Governor's Budget, or that cannot be included in the 2003/04 program reductions due to statutory or contractual financial obligations.
2. The increase in the Student Faculty ratio to 19.9-to-1 will be based on targeted enrollment growth to 337,189 FTES in 2003/04, which does not include the additional 6,744 FTES to whom campuses are expected to provide instructional services during the college year. This is the same enrollment base used in the calculation of the \$53.5 million reduction proposed in the Governor's Budget.
3. All revenue assumed from 2002/03 and 2003/04 State University Fee rate increases will be allocated to offset permanent budget reductions identified in the Governor's Budget for the 2003/04 fiscal year and to increase the State University Grant fund pool in accordance with CSU systemwide mandatory fee policy. Although campuses are not expected to collect Summer 2004 revenue for the fee rate increase effective Fall 2003 until the 2004/05 fiscal year, this revenue will be presumed to be set aside to offset campus General Fund reductions scheduled for 2003/04 – which, on the basis of 2001/02 enrollment patterns, should be approximately \$8.6 million after making the appropriate one-third set-aside to increase the State University Grant pool.
4. All allocations for enrollment growth in 2003/04 are based on the marginal cost rate of \$7,813 per FTES. Of this amount \$406 are set aside to increase the State University Grant pool of funds. The remaining \$7,407 are allocated for enrollment growth. The Budget Redesign process

approved by the Board of Trustees in 1994 requires that the allocation of budget year expenditure increases be offset by anticipated income from student fee revenue to determine the campuses and Chancellor's Office General Fund allocations. However, this process will be modified for 2003/04 enrollment allocations to provide one time General Fund support related to the mix of students driving fee revenue calculations, pending an analysis of the impact of budget cuts and fee increases on student enrollment patterns.

Although not specifically identified in this memorandum, campuses are advised that Mandatory Costs identified in the trustees' budget for compensation, health benefits rate increases, and increased workers compensation premium costs must be covered from 2003/04 resources. New space will be funded from a combination of campus fee revenue and CSU General Fund support. Additionally, campuses must make permanent budget reductions of \$43 million that were allocated as one-time reductions in the 2002/03 Final Budget.

Attachment A: Summary of 2003/04 Budget Allocations – General Fund

Attachment C: 2003/04 Base Budget Adjustment for 2002/03 1% Enrollment Distribution

Attachment G: Preliminary 2003/04 State University Grant Allocations

Due to the General Fund budget actions required in 2003/04 and the treatment in the allocation process of student fee revenue based on two-year increases in State University Fee rates, it is necessary to depart from previous budget reporting formats. Attachment A shows the permanent allocation of General Fund support provided for the one percent enrollment distribution made in 2002/03 based on campuses' Fall 2002 census data, at the marginal cost funding rate for 2002/03 of \$6,487 per FTES. Attachment C provides the details of this allocation. This added enrollment distribution helped form the base budget used to determine the campuses' pro-rata share of unallocated budget cuts.

Attachment A also shows the distribution of the total \$326 million reduction requested in the Governor's Budget and the technical accounting adjustments that have been made for bond payments and funding associated with State charge-backs for services it provides to CSU. The funding provided for increased retirement costs was added to campuses' budgets after the General Fund base for budget cuts was determined. Enrollment growth funding is based on the \$7,407 per FTES marginal cost rate cited earlier in this memorandum. Campuses' General Fund allocations for enrollment growth include funding that is provided on a one-time basis for 2003/04 only, pending analysis of the impact of CSU budget cuts and student fee increases on enrollments. The specific distribution of the one-time funds is found on Attachment F.

State University Grants The State University Grant set-asides reflect both the one-third set aside associated with fee rate increases and the marginal cost set-aside associated with enrollment growth. The State University Grant allocations are based on a 90% distribution of the \$184.5 million estimated 2003/04 SUG pool, which includes the 2002/03 initial SUG appropriation of \$105,035,000, plus one-third of the anticipated revenue increases for the annualized amount of the 2002/03 and 2003/04 fee increases, and a portion of the revenues generated for budgeted enrollment growth. The SUG funding associated with the fee increase included in the Governor's Budget is being allocated at this time with the expectation that campus financial aid offices will be predicating 2003/04 financial aid awards on the proposed fees levels reflected in the Governor's Budget.

Campus SUG allocations will be adjusted by approximately \$18 million in the Final Budget allocation to reflect 100 percent of the total available SUG funding. Final Budget SUG allocations will be based on the 2002/ 03 preliminary database of financial aid expenditures and any available updates to actual and proposed enrollments. Attachment G provides a detailed display of the SUG allocations. Questions concerning the methodology or information in this attachment should be directed to Mary Robinson, (562) 951- 4737.

Attachment B: Summary of 2003/04 Campus Allocations – State University Fee Income

Attachment B identifies the CSU estimated revenue generated from enrollment growth and State University Fee rate increases. CSU revenue calculations are based on previously defined methodology based on actual 2001/02 enrollment distributions. The income on Attachment B has been classified as enrollment growth and fee related. The fee related increases are subject to the one-third set-aside for financial aid policy first adopted by the Board of Trustees in March 1993. The revenue associated with enrollment growth is subject to the marginal cost set aside provisions that are implemented on a year-to-year basis and that have been previously used in the budget allocation process.

Revenue associated with Summer 2004 fee income related to the 2003/04 rate increases is not identified in this memorandum. The estimate of increase based on the 2001/02 enrollment distribution patterns is approximately \$12.9 million. One-third of this income would be subject to set-aside for financial aid. The estimate of income for the 2004/05 budget allocation process will be based on enrollment distributions reported for 2002/03. As such, the estimate of revenue associated with the 2003/04 fee rate increase in Summer 2004 may change. Nevertheless, the net revenue (after the financial aid set-aside) associated with the 2003/04 fee rate increase in Summer 2004 is presumed to be available to offset 2003/04 budget reductions.

Attachment D: 2003/04 Base Budget General Fund Reductions

The Governor's Budget specifies \$183.3 million in specified program reductions and \$142.8 million in unallocated budget cuts to achieve an overall reduction of \$326.1 million in General Fund costs. The Governor's Budget assumes the unallocated cuts on CSU programs will be offset by \$142 million in revenue from fee increases implemented in 2002/03 and assumed for 2003/04.

The applicable General Fund budget base is equal to the Final Budget Allocations made in coded memorandum B 02-04, plus the allocation of enrollment funding received for the 1% enrollment supplement after the fiscal year began. The Systemwide Provisions applicable budget base reflects those unallocated activities that are subject to the budget reductions specified in the Governor's Budget. For example, unallocated items such as lease bond payments and funding for annuitant dental benefits would not be subject to the reductions proposed in the Governor's Budget. The applicable General Fund base is used to determine the pro-rata share of budget cuts that have been allocated for Student Services, Academic and Institutional Support, and the Unallocated Reductions. Since fee revenue is assumed to be available to offset the Unallocated Reductions, the pro-rata reduction for unallocated budget cuts have been made only at campuses and CSU entities with specified enrollments.

Increase in the Student Faculty Ratio The allocation of reductions for increasing the student faculty ratio is based on the \$7,813 marginal cost funding per FTES calculated for the 2003/04 budget process. The faculty salary and benefits share of that total equals \$3,026 per FTES. Campus FTES targets for 2002/03 were divided by 18.9 to calculate faculty required to teach budgeted enrollment targets. Since the Governor's Budget proposes that CSU faculty teach one additional FTES, the calculated faculty requirement for each campus is multiplied by \$3,026 to determine the presumed marginal cost savings for the State, and therefore additional costs for the campus. This methodology follows the methodology used by the Department of Finance to determine the reduction associated with the student faculty ratio increase.

Reduction in Funding for Outreach The Governor's Budget for 2003/04 includes a \$12.6 million reduction in CSU's outreach programs. To achieve this reduction, CSU has eliminated funding that has supported the College Readiness Program (\$290,808), Educational Opportunity Program Outreach (\$2,000,000), the Collaborative Academic Preparation Initiative (\$9 million), and the Precollegiate Academic Preparation Program (\$5.3 million). These program reductions total \$16,590,808. Since this amount exceeds the Governor's Budget program reductions by \$3,994,808, CSU will use this net amount to fund the maintenance costs for the Diagnostic Writing Service and to fund a new program called the Early Assessment Academic Preparation Program.

The \$2 million campus reductions for EOP outreach is at the level provided in coded memorandum B 99-03. The reduction in campus College Readiness Program funding is based on reallocation of the program to campuses in 1991/92 (see coded memorandum BP 91-50).

The proposed budget reduction in student services for CSU campuses, coupled with a reduction and an elimination of several existing outreach efforts, compel the CSU to seek alternative methods of meeting the needs of those students who are not on track to be eligible for the CSU and those students who are not fully prepared to demonstrate proficiency in English and mathematics prior to enrollment at CSU. While the College Readiness Program (CRP), Educational Opportunity Program Outreach (EOP Outreach), Collaborative Academic Preparation Initiative (CAPI) and Precollegiate Academic Preparation Program (PAD) programs will no longer exist as they have been administered, the services they offer will continue to be provided but in an even more comprehensive, focused, and targeted manner.

The experiences learned from these four programs have been sharpened into a new level of services that retain their key elements: (1) outreach to identify students who would benefit from college preparatory courses and activities currently provided in the EOP Outreach program, (2) activities to increase the enrollment of high school students in mathematics provided in the CRP program, (3) teacher professional development activities in teaching critical reading and reading comprehension skills, and (4) tutorial services to high school students. The Early Assessment Academic Preparation Program will continue to provide the valuable support for high school students to gain the appropriate academic preparation, including proficiency in English and mathematics prior to entry to CSU. Additional information about the Early Assessment Academic Preparation Program will be provided to campuses shortly.

Questions regarding the reductions for outreach should be directed to Allison Jones,
(562) 951-4744

Attachment E: 2003/04 Base Budget General Fund Expenditure Adjustments

Attachment F: 2003/04 Budget Plan Enrollment Growth Expenditure Adjustments

Attachment E shows the base budget reductions that affect campuses' General Fund allocations for 2003/04. The combined impact of unallocated and program reductions on the budget base is shown in column two of the attachment. The increase in General Fund support for 2002/03 retirement costs is also identified, as well as the adjustments that denote the fund shift from General Fund to campus fee revenue support in amounts equal to the set-asides calculated for State University Grant increases.

Attachment F shows the distribution of enrollment funding campuses will receive for the 16,057 FTES growth requested in the trustees' October budget plan and the 6,744 FTES additional growth associated with the \$45 million funding increase CSU received in the Governor's Budget. Enrollment growth is funded at the gross marginal cost rate of \$7,813 per FTES for all campuses. Attachment F shows the distribution of these funds for State University Grant set-asides at \$406 per FTES and the fee revenue and General Fund portions of the remaining \$7,407 per FTES for enrollment related costs. These allocations have been made consistent with allocation methodologies used in prior enrollment funding allocations to campuses.

Attachment F identifies fee revenue that will be used to support new space scheduled to open in 2003/04 at \$7.20 per square foot, in lieu of a new methodology for the space standard (see trustees' budget, page 29). The use of campus-specific revenue to cover these costs is a new component of marginal cost enrollment funding that is applied in 2003/04 only. Campuses should not expect that this use of marginal cost funding would continue in subsequent fiscal years.

Attachment F also shows one time funding support that will be used to increase General Fund support for enrollment growth at campuses that are expected to receive a disproportionate share of marginal cost enrollment funding from fee revenue. This one time supplement is provided pending analysis of the impact of budget cuts and fee rate increases on CSU enrollment patterns. Campuses may plan on the use of these funds for one time expenses in 2003/04 only. The return of these funds will be made as base budget adjustments in the budget allocation process for fiscal year 2004/05.

This memorandum and the accompanying attachments are available at the Budget Office web site <http://www.calstate.edu/budget/>. Questions regarding the allocations made in this memorandum should be directed to me or to Budget Office analysts at (562) 951-4560.
