

CSU Seismic Retrofit Priority Listings

Revised 1-30-12

As a part of the Trustee's seismic policy, the CSU Office of the Chancellor maintains two systemwide lists, identified by the CSU Seismic Review Board, of existing facilities with potential hazards considered significant enough to warrant priority attention for seismic retrofit.

Priority List 1

This list identifies facilities that we consider to warrant urgent attention for seismic upgrade as soon as resources can be made available regardless of other improvements that may be contemplated in the future for the respective facility. Interim necessary repair and maintenance work is allowed.

Priority List 2

This list identifies buildings that we consider to warrant special attention for seismic upgrade. By policy, Priority List 2 projects must be seismically retrofitted when any new construction work occurs on a listed facility. Repair and maintenance work is not considered to trigger this retrofit requirement.

Both Priority Lists are periodically updated to reflect work completed and facilities that may over time be added. The listings are presented alphabetically by campus.

The California Building Code, Chapter 34 may require seismic evaluation and retrofit for facilities not on these lists. See Section 3.4 of CSU Seismic Requirements.
