

THE CALIFORNIA STATE UNIVERSITY

Telecommunications Infrastructure Planning Standards

Third Edition, Effective May 2007

Prepared by:

Office of the Chancellor,
Information Technology Services and
Capital Planning, Design and Construction

TABLE OF CONTENTS

<u>Topic</u>	<u>Page(s)</u>
Section 1: Introduction and General Requirements	1-1
1.1 The TIP Standards Concept	1-1
1.1.1 Intent	1-1
1.1.2 Purpose of the TIPS Document	1-2
1.2 Foundations of the TIP Standards	1-3
1.2.1 History	1-3
1.2.2 Strategic Approach	1-4
1.2.2.1 The Integrated Technology Strategy	1-4
1.2.2.2 The CSU's Commitment to Technology Infrastructure	1-6
1.3 Design Implications	1-8
1.3.1 Classrooms	1-9
1.3.2 Laboratories	1-9
1.3.3 Libraries	1-9
1.3.4 Common Areas	1-10
1.3.5 Conference Rooms	1-10
1.3.6 Office Spaces	1-10
1.4 Document Overview	1-11

<u>Topic</u>	<u>Page(s)</u>
Section 2: Facilities Planning and Programming	2-1
2.1 General Goals and Objectives	2-1
2.1.1 Introduction	2-1
2.1.2 Design Concepts	2-2
2.2 Reference Standards	2-4
2.3 Telecommunications Design Elements	2-7
2.3.1 Element Definition	2-7
2.3.2 Service Spaces	2-9
2.3.2.1 Service Entrance Room	2-10
2.3.2.2 Equipment Room	2-11
2.3.2.3 Telecommunications Room	2-14
2.3.3 Telecommunications Pathways	2-21
2.3.3.1 Interbuilding Distribution System	2-21
2.3.3.2 Intrabuilding Backbone	2-22
2.3.3.3 Horizontal Pathways	2-23
2.3.3.4 Station Outlet	2-24
2.3.3.5 Wireless Support Provisions	2-25
2.3.4 Summary of Physical Requirements	2-36
2.4 Campus Facilities Support Requirements	2-37
2.4.1 Offices	2-37
2.4.2 Conference Rooms	2-38
2.4.3 Instructional Areas	2-38
2.4.3.1 General Requirements	2-38
2.4.3.2 Small Classrooms	2-41
2.4.3.3 Large Classrooms and Lecture Halls	2-42
2.4.3.4 Laboratories	2-42
2.4.3.5 High Technology Facilities	2-43
2.4.4 Libraries	2-46
2.4.5 Residence Halls	2-46
2.4.6 Public Space	2-47
2.5 Summary of Design Considerations and Requirements	2-47

<u>Topic</u>	<u>Page(s)</u>
Section 3: Infrastructure and Pathway Design	3-1
3.1 General Considerations	3-1
3.1.1 Introduction	3-1
3.1.2 Reference Sources	3-2
3.1.3 Documentation Standards	3-2
3.1.4 New Construction vs. Retrofit	3-5
3.2 Telecommunication Space Design	3-7
3.2.1 Electrical and Mechanical Requirements	3-7
3.2.1.1 Electrical Services	3-8
3.2.1.2 Telecommunications Grounding System	3-11
3.2.1.3 Mechanical Air Handling System Options	3-14
3.2.2 Service Entrance Rooms	3-17
3.2.2.1 Location	3-17
3.2.2.2 Size	3-18
3.2.2.3 Layout and Configuration	3-18
3.2.3 Equipment Rooms	3-21
3.2.3.1 Location	3-23
3.2.3.2 Size	3-23
3.2.3.3 Layout and Configuration	3-24
3.2.4 Telecommunications Rooms	3-28
3.2.4.1 Location	3-28
3.2.4.2 Size	3-29
3.2.4.3 Layout and Configuration	3-29
3.2.5 Other Telecommunications Spaces	3-31
3.2.6 Retrofit Space Issues	3-31
3.2.7 Telecommunications Space Security	3-34
3.2.7.1 Spaces to be Controlled	3-34
3.2.7.2 Other Resources Requiring Access Control	3-35
3.3 Telecommunications Pathway Design	3-36
3.3.1 Interbuilding Distribution Systems	3-36
3.3.1.1 Utility Tunnels	3-37
3.3.1.2 Conduit and Utility Vault Systems	3-38
3.3.1.3 Vaults and Pull Boxes	3-41
3.3.2 Intrabuilding Backbones	3-43
3.3.2.1 Sizing	3-44
3.3.2.2 Design Details	3-44
3.3.3 Horizontal Pathways	3-46
3.3.3.1 Cable Trays	3-46
3.3.3.2 Station Outlets	3-50
3.3.4 Retrofit Design Issues	3-52
3.3.4.1 Access and Installation	3-52
3.3.4.2 Firestopping	3-55

<u>Topic</u>	<u>Page(s)</u>
Section 4: Media Systems Design	4-1
4.1 General Considerations	4-1
4.1.1 Introduction	4-1
4.1.2 Cable Components	4-3
4.2 Copper Cable Systems	4-3
4.2.1 Interbuilding Backbone Copper Cable	4-4
4.2.1.1 General Design Requirements	4-4
4.2.1.2 Cable Sizing	4-7
4.2.1.3 Cable Protection	4-8
4.2.1.4 Splice Cases	4-10
4.2.2 Intrabuilding Backbone Copper Cable	4-11
4.2.2.1 General Design Requirements	4-11
4.2.3 Intrabuilding Horizontal Copper Cable	4-12
4.2.3.1 General Design Requirements	4-13
4.2.3.2 Work Area Outlets	4-14
4.2.3.3 Cross-Connect Equipment	4-16
4.3 Fiber Optic Cable Systems	4-19
4.3.1 General Design Considerations	4-19
4.3.1.1 Multimode Fiber Cable Selection	4-20
4.3.1.2 Connectors and Couplers	4-22
4.3.1.3 Fiber Optic Patch Panels	4-23
4.3.2 Fiber Cable Design Requirements	4-24
4.3.2.1 Interbuilding Backbone Fiber Cable	4-24
4.3.2.2 Intrabuilding Backbone Fiber Cable	4-26
4.3.2.3 Intrabuilding Horizontal Fiber Cable	4-27
4.4 Coaxial Cable Systems	4-28
4.4.1 General Design Considerations	4-29
 Appendix A: Reference Materials	 A-1

Editorial Contributors

The California State University is indebted to the individuals listed below for their contributions to this third edition of the TIPS document. Although much of the text in the new edition has been carried forward from the previous version, the document itself has been reformatted to a considerable degree, a modest amount of somewhat redundant material has been eliminated, and some out-of-date sections have been updated or replaced with more current information. A few new topics have been introduced, as well. These efforts have been expended to maintain and continue the viability of TIPS as a document important to future technology development in the CSU, following the tradition established by its original publication in 1993.

Network and Technology Alliance, Infrastructure Physical Plant Working Group:

Lynn Anderson, CSU Dominguez Hills	Justin Clausen, CSU Monterey Bay
Scott Claverie, CSU Chico	Harvey DeLorm, Chair, Sonoma State University
Vince Gray, CSU San Marcos	Russ Greenspan, Sonoma State University
Satinder Gulati, CSU Chancellor's Office	David Hackenberg, PlanNet Consulting
Kent McKelvey, San Diego State University	Greg Nicols, CSU Northridge
Bill Peterson, CSU Chico	Kenneth Secor, CSU Chancellor's Office
Paul Serafimidis, CSU Sacramento	David Stein, PlanNet Consulting
Bill Fairchild, CSU Northridge	Tom Ussery, CSU Chico

Additional CSU Personnel:

Benny Kurashima, California Polytechnic State University, San Luis Obispo

Other Important Contributors:

CSU Mechanical Review Board Members—

Jairam Agaram, P.E., Digital Energy, Inc.
Douglas Effenberger, P.E., Power Engineering
Kent Peterson, P.E., P2S Engineering, Inc.
Steven Taylor, P.E., Taylor Engineering

Additional Persons or Groups—

Representatives of the American Power Conversion (APC) Learning Center
