1 INTRODUCTION

1.1 Purpose
The purpose of these guidelines is to establish the process, procedures, and criteria through which the California Department of Fish and Wildlife (CDFW) will administer competitive grants for multibenefit ecosystem and watershed protection and restoration projects in accordance with statewide priorities. To accomplish this, two grant programs are being created; the Watershed Restoration Grant Program and the Delta Water Quality and Ecosystem Restoration Grant Program, collectively named Restoration Grant Programs. The Watershed Restoration Grant Program will focus on watershed restoration outside of the Sacramento-San Joaquin Delta (Delta) and the Delta Water Quality and Ecosystem Restoration Grant Program will focus on water quality, ecosystem restoration and fish protection facilities that benefit the Delta.

These guidelines include: eligibility requirements; general program requirements; solicitation notice, submittal, and evaluation of grant applications; and award of grant funding. Separate, but related, solicitations will provide detailed information regarding how to apply, and priorities and evaluation criteria specific to each solicitation. A list of useful web links is provided in Appendix A and a glossary of terms is provided in Appendix B.

1.2 Background
The CDFW’s mission is to manage California’s diverse fish, wildlife, and plant resources, and the habitats upon which they depend, for their ecological values and for their use and enjoyment by the public. Grants will be awarded on a competitive basis using evaluation criteria described in Section 4. These guidelines were developed pursuant to California Water Code (CWC) Section 79706(a). The following legislation is the basis of the guidelines:

- CWC Section 79700 et seq. – Water Quality, Supply, and Infrastructure Improvement Act of 2014 (Proposition 1); and
- Fish and Game Code (FGC) Section 1501.5(b) – CDFW may grant funds for fish and wildlife habitat preservation, restoration, and enhancement to public agencies, Indian tribes, and nonprofit entities whenever CDFW finds that the grants will assist it in meeting its duty to preserve, protect, and restore fish and wildlife.

Prior to finalizing the guidelines, CDFW will post the draft guidelines on its website (www.wildlife.ca.gov/Explore/Grant-Opportunities) for 30 days and then hold three public meetings, as a means to solicit and consider public comments (CWC §79706[b]).
The California Natural Resources Agency will also post the draft and final guidelines on its website, at http://bondaccountability.resources.ca.gov. (CWC § 79708[d]).

1.3 Funding
Funding for competitive grants will depend on fund availability. The Water Quality, Supply, and Infrastructure Improvement Act of 2014 (Proposition 1), which was passed by California voters in November 2014, amended the CWC to add among other articles, Sections 79737 and 79738, authorizing the Legislature to appropriate to $285,000,000 and $87,500,000 to the CDFW for watershed restoration projects statewide; and water quality, ecosystem restoration, and fish protection facilities that benefit the Delta; respectively. The 2015-2016 Governor’s Budget proposes $31.4 million for watershed restoration projects statewide and water quality, ecosystem restoration, and fish protection facilities that benefit the Delta.

1.4 Program Purposes
Proposition 1 provides funding to implement the three broad objectives of the California Water Action Plan: more reliable water supplies; the restoration of important species and habitat; and a more resilient, sustainably managed water resources system (water supply, water quality, flood protection, and environment) that can better withstand inevitable and unforeseen pressures in the coming decades. Funds granted by the CDFW will be primarily focused on addressing the objective of restoring important species and habitat; however, co-benefits of such actions may contribute towards attaining the other California Water Action Plan objectives. It is the intent that these funds will be invested in projects that:

- Provide multiple benefits, addressing critical statewide needs and priorities (CWC §79707[a]);
- Advance the purposes articulated in CWC Section 79732;
- Leverage private, federal, or local funding or produce the greatest public benefit (CWC §79707[b]);
- Promote State planning priorities consistent with Section 65041.1 of the Government Code and sustainable communities strategies consistent with the provisions of subparagraph (B) of paragraph (2) of subdivision (b) of Section 65080 of the Government Code (CWC §79707[i]), to the extent feasible;
- Apply best available science1 to inform decisions regarding water resources (CWC §79707[d]);

1 Refer to Appendix C of the Delta Plan (Delta Stewardship Council 2013) for guidelines and criteria for defining and assessing best available science. Available: http://deltacouncil.ca.gov/delta-plan-0
• Employ new or innovative technology or practices including decision support tools that support integrated resource management (CWC §79707[e]);
• Achieve agricultural and forested landscapes preservation through use of conservation easements and voluntary landowner participation, including, but not limited to, the use of easements pursuant to Division 10.2 (commencing with Section 10200) and Division 10.4 (commencing with Section 10330) of the PRC and voluntary habitat credit exchange mechanisms, to the extent feasible (CWC §79707[j]); and

2 Eligibility Requirements
The solicitation will describe the eligibility of grant applicants, nature and scope of projects eligible for funding, eligibility criteria, and any restrictions on the use of funds supporting that specific solicitation. Requirements and limitations imposed in each solicitation may vary according to the specific priorities, focus, and fund source for the solicitation.

2.1 Eligible Grant Applicants
Eligible entities are limited to public agencies, nonprofit organizations, public utilities, federally recognized Indian tribes, state Indian tribes listed on the Native American Heritage Commission’s California Tribal Consultation List, and mutual water companies (CWC §79712[a]). Additionally, in order to be eligible for funding:

• A project proposed by a public utility that is regulated by the Public Utilities Commission or a mutual water company shall have a clear and definite public purpose and shall benefit the customers of the water system and not the investors (CWC §79712[b][1]);
• An urban water supplier shall adopt and submit an urban water management plan in accordance with the Urban Water Management Planning Act (Part 2.6 (commencing with Section 10610) of Division 6) (CWC §79712[b][2]);
• An agricultural water supplier shall adopt and submit an agricultural water management plan in accordance with the Agricultural Water Management Planning Act (Part 2.8 (commencing with Section 10800) of Division 6) (CWC §79712[b][3]); and
• In accordance with Section 10608.56, an agricultural water supplier or an urban water supplier is ineligible for funding unless it complies with the requirements of Part 2.55 (commencing with Section 10608) of Division 6 (CWC §79712[b][4]).

Grant proposals from private individuals or for-profit enterprises will not be accepted. Private individuals and for-profit enterprises interested in submitting proposals are encouraged to work with eligible entities listed above.
2.2 Eligible Project Types

Funds will be allocated to projects within the two grant programs: watershed restoration projects of statewide importance outside the Delta, and water quality, ecosystem restoration and fish protection facilities that benefit the Delta. Projects funded under the Restoration Grant Programs should implement objectives and actions outlined in the California Water Action Plan, with emphasis on ecosystem restoration. Examples of potentially eligible project types are identified below for each of the grant programs. These should not be viewed as exhaustive lists of eligible project types. The CDFW will award a variety of grants which may include planning, acquisition, implementation, and scientific studies and assessment. Specifics concerning eligible project types may vary and will be documented in the solicitation.

Watershed Restoration Grant Program (CWC §79737[b])

- Restoring/protecting coastal wetland habitat;
- Improving forest health;
- Restoration of mountain meadows;
- Modernizing stream crossings, culverts, and bridges;
- Reconnecting historical flood plains;
- Installing or improving fish screens;
- Providing fish passage;
- Restoring river channels;
- Restoring or enhancing riparian, aquatic, and terrestrial habitat;
- Supplying water to wetlands;
- Improving ecological functions;
- Acquiring from willing sellers conservation easements for riparian buffer strips;
- Improving local watershed management; and
- Removing sediment or trash.

Delta Water Quality and Ecosystem Restoration Grant Program (CWC §79738)

- Projects to improve water quality or that contribute to the improvement of water quality;
- Habitat restoration, conservation, and enhancement projects to improve condition of special-status, at risk, endangered, or threatened species; and
- Scientific studies and assessments that support the Delta Science Program or projects eligible for funding under CWC §79738.
2.3 Specific Funding Requirements
Watershed Restoration Grant Program (CWC §79737)

- These funds are available for water quality, river, and watershed protection and restoration projects of statewide importance outside of the Delta;
- Funding shall only be used for projects that will provide fisheries or ecosystem benefits or improvements that are greater than required applicable environmental mitigation measures or compliance obligations, except for any water transfers for the benefit of subsection (d) of Section 3406 of the Central Valley Project Improvement Act (CVPIA) (Title 34 of Public Law 102-575);
- Funds shall not be expended to pay the costs of the design, construction, operation, mitigation, or maintenance of Delta conveyance facilities;
- Funds expended for the acquisition of a permanent dedication of water shall be in accordance with Section 1707 of the Water Code, where the State Water Resources Control Board (SWRCB) specifies that the water is in addition to water that is required for regulatory requirements as provided in subdivision (c) of Section 1707 (CWC §79709[a]). The acquisition of long-term transfers of water shall be completed in accordance with Section 1735, 1736 and 1737 of the Water Code (CWC §79709[b]); and
- Funds provided by this division shall not be used to acquire land via eminent domain (CWC §79711[g]).

Delta Water Quality and Ecosystem Restoration Grant Program (CWC §79738)

- Funding will be available for projects that will provide fisheries or ecosystem benefits or improvements that are greater than required applicable environmental mitigation measures or compliance obligations (CWC §79732[b]);
- Funds shall not be used to acquire land via eminent domain (CWC §79738[e]);
- Funds shall not be expended to pay the costs of the design, construction, operation, mitigation, or maintenance of Delta conveyance facilities (CWC §79738[f]); and
- Funds expended for the acquisition of a permanent dedication of water shall be in accordance with Section 1707 of the Water Code, where the SWRCB specifies that the water is in addition to water that is required for regulatory requirements as provided in subdivision (c) of Section 1707 (CWC §79709[a]). The acquisition of long-term transfers of water shall be completed in accordance with Section 1735, 1736 and 1737 of the Water Code (CWC §79709[b]).
3 General Program Requirements

Proposals submitted must be in full compliance with all stated requirements of each solicitation. Any changes to the proposal application submission process will be posted in a timely manner on the CDFW’s Restoration Grant Programs website (http://www.wildlife.ca.gov/Conservation/Watersheds/Restoration-Grants).

3.1 Conflict of Interest

All applicants and individuals who participate in the review of submitted proposals are subject to State and federal conflict of interest laws. Any individual who has participated in planning or setting priorities for a specific solicitation or who will participate in any part of the grant development and negotiation process on behalf of the public is ineligible to receive funds or personally benefit from funds awarded through that solicitation. Applicants should also be aware that certain State and federal agencies may submit proposals that will compete for funding. Employees of State and federal agencies may participate in the review process as scientific/technical reviewers but are subject to the same State and federal conflict of interest laws.

Failure to comply with the conflict of interest laws, including business and financial disclosure provisions, will result in the proposal being rejected and any subsequent grant agreement being declared void. Other legal actions may also be taken. Applicable statutes include, but are not limited to, California Government Code Section 1090 and Public Contract Code Sections 10365.5, 10410 and 10411.

3.2 Confidentiality

Once the Proposal has been submitted to CDFW, any privacy rights, as well as other confidentiality protections afforded by law with respect to the application package will be waived. Unsealed proposals are public records under the California Government Code Sections 6250-6276.48.

3.3 Conservation Corps

All applicants shall consult with the California Conservation Corps or a certified local conservation corps as to the feasibility of using their services as defined in Section 14507.5 of the Public Resources Code to implement projects (CWC §79734).

3.4 Labor Code Compliance

Grants awarded through the Restoration Grant Programs may be subject to prevailing wage provisions of Part 7 of Division 2 of the California Labor Code (CLC), commencing with Section 1720. Typically, the types of projects that are subject to the prevailing wage requirements are public works projects. Existing law defines "public works" as, among other things, construction, alteration, demolition, installation, or repair work done
under contract and paid for in whole or in part out of public funds. Assembly Bill 2690 (Hancock, Chapter 330, Statutes of 2004) amended CLC Section 1720.4 to exclude most work performed by volunteers from the prevailing wage requirements until January 1, 2017.

The Grantee shall pay prevailing wage to all persons employed in the performance of any part of the project if required by law to do so. Any questions of interpretation regarding the CLC should be directed to the Director of the Department of Industrial Relations (DIR), the State Department having jurisdiction in these matters. For more details, please refer to the DIR website at http://www.dir.ca.gov.

3.5 Environmental Compliance
Activities funded under this grant program must be in compliance with applicable State and federal laws and regulations, including the California Environmental Quality Act (CEQA), National Environmental Policy Act (NEPA), Delta Plan, and other environmental permitting requirements. The applicant is solely responsible for project compliance and proposals may include in their budgets the funding necessary for compliance related tasks. The solicitation will provide information on common permits required and where to get information related to permit requirements.

For grant proposals prepared under the Delta Water Quality and Ecosystem Restoration Grant Program that include an action that is likely to be deemed a covered action, pursuant to CWC Section 85057.5, the applicant is responsible for ensuring consistency with the Delta Plan policies. In such instances, the proposal shall include a description of the approach through which consistency will be achieved and may include in their budgets the funding necessary to complete related tasks.

3.6 Water Law
Funded grants that address stream flows and water use shall comply with the CWC, as well as any applicable State or federal laws or regulations. Refer to Section 2.3 (Specific Funding Requirements) of this document for specific requirements stipulated in Proposition 1 (CWC §79709). Any proposal that would require a change to water rights, including, but not limited to, bypass flows, point of diversion, location of use, purpose of use, or off-stream storage shall demonstrate an understanding of the SWRCB processes, timelines, and costs necessary for project approvals by SWRCB and the ability to meet those timelines within the term of a grant. In addition, any proposal that involves modification of water rights for an adjudicated stream shall identify the required legal process for the change as well as associated legal costs. Prior to its completion, any water right acquisition must be supported by a water rights appraisal approved by the Department of General Services Real Property Services Section.
All applicants must demonstrate to CDFW that they have a legal right to divert water and sufficient documentation regarding actual water availability and use. For post-1914 water rights, the applicant must submit a copy of a water right permit or license on file with the SWRCB. Applicants who divert water based on a riparian or pre-1914 water right must submit written evidence of the right to divert water and the priority in the watershed of that diversion right with their proposal. All applicants must include past water diversion and use information reported to the SWRCB, required by CWC section 5101. Such reports include Progress Reports of Permittee and Reports of Licensee for post-1914 rights, and Supplemental Statements of Water Diversion and Use for riparian and pre-1914 water rights. All water rights must be accompanied by any operational conditions, agreements or court orders associated with the right, as well as any SWRCB orders affecting the water right.

3.7 Signage
All Grantees will Include signage, to the extent practicable, informing the public that the project received funds from the Water Quality, Supply, and Infrastructure Improvement Act of 2014 (CWC §79707[g]).

3.8 Monitoring Requirements
Each proposal must include a plan describing an approach through which project performance will be monitored and evaluated. The plan should include a list of project-specific performance measures that will be used to assess project outcomes/trajectories, and should provide sufficient detail of how these performance measures will be quantified and assessed to allow an evaluation of the effectiveness of the proposed action(s) at achieving the stated objectives.

Each proposal must also include a description of the processes through which data will be collected, stored, and disseminated to participants, stakeholders, public, and the State. Data may include, but are not limited to technical information such as designs, feasibility studies, reports, and information gathered for a specific project in any phase of development including the planning, design, construction, operation, and monitoring of a project.

If required by the project, water quality monitoring data shall be collected and reported to the SWRCB in a manner that is compatible and consistent with surface water monitoring or groundwater data systems administered by the SWRCB (e.g., California Environmental Data Exchange Network [CEDEN] for surface water data) (CWC §79704). Any watershed monitoring data shall be collected and reported to the Department of Conservation in a manner that is compatible and consistent with the statewide watershed program administered by the Department of Conservation (CWC...
§79704). Additional specifications concerning data management and quality assurance/quality control may be stipulated within each solicitation.

All Grantees will be required to provide periodic progress reports and a final report. Specific guidance on performance measures, data management, reporting and monitoring requirements desired by CDFW or required by law will be provided in each solicitation or the grant agreement.

4 PROPOSAL SELECTION

4.1 Solicitation Notice
CDFW will solicit grant proposals with the release of a solicitation, which will provide detailed instructions on the mechanics of submitting proposals and specific information on submittal requirements. Each solicitation will describe the start and end date to the application process, and may place minimum or maximum limitations on the dollar amount of grants to be awarded.

Draft solicitations will be made available on the CDFW’s Restoration Grant Programs website to allow for public review and comment. The final solicitation will be available on the CDFW’s Watershed Restoration Grant Programs website.

4.2 Proposal Submittal Process
Generally, the application process will be conducted using forms provided through the CDFW’s Restoration Grant Programs website. Application forms and instructions will be included in each solicitation. All materials, including application, attachments and supporting documentation, must be successfully submitted by the deadlines stipulated within the solicitation. Late submittals will not be accepted.

4.3 Proposal Review and Selection Process
Proposals submitted by the deadline will be evaluated using the multi-step review process described below. Each solicitation may have variations in the review process and criteria; applicants should review the specific review process and criteria employed in association with each solicitation.

4.3.1 Administrative Review
Each proposal will be subjected to an administrative review, which will evaluate the eligibility and completeness of the application. Each application will first be evaluated for compliance with the eligibility criteria stipulated in the solicitation. Applications deemed eligible will then be evaluated in accordance with the solicitation for completeness. All information requested in the solicitation must be provided and in the
required formats. This review will use a “Pass/Fail” scoring method. Applications that are determined to be ineligible or incomplete will not be considered for funding.

4.3.2 Technical Review

All eligible and complete proposals will be evaluated and scored by technical reviewers. At least two technical reviewers will be assigned to each proposal and will include representatives from CDFW, including individuals from regional offices and headquarters, as appropriate. CDFW may request reviewers from other agencies or other outside experts to participate in the technical review. Individuals selected to serve as technical reviewers will be professionals in fields relevant to the proposed project (CWC §79707[f]). The technical reviewers will individually score proposals in accordance with criteria documented in the solicitation.

Technical reviewers will independently score proposals in accordance with the evaluation criteria documented in the solicitation. Table 1 presents a suite of review criteria that are meant to be broadly representative of the types of criteria upon which proposals will be evaluated. The specific review criteria established for each solicitation may vary.

Table 1. Overview of Review Criteria.

| 1. Applicant Qualifications/Ability to Accomplish Project | Extent to which the proposal demonstrates that the applicant has the qualifications, experience, and capacity to perform the proposed tasks. |
| 2. Project Description – Primary Objectives | Extent to which the proposal includes a detailed description of the project, including primary objectives and sufficient rationale to justify the project need. |
| 3. Project Description – Implementation | Extent to which the proposed project is technically feasible and the project description is sufficiently detailed to serve as a statement of work for a grant agreement. |
| 4. Implement Actions of the California Water Action Plan | Extent to which the proposed project implements actions within the timeframe described in the California Water Action Plan. |
| 5. Linkages With Other Restoration Activities | Extent to which the proposed project implements existing conservation, restoration, recovery plans, or other relevant State plans or policies. |
| 6. Partner Support | Extent to which the proposed project demonstrates stakeholder support for the project (number, diversity of partners). |
| 7. New or Innovative Technology or Practices | Extent to which the proposed project employs new or innovative technology or practices. |
Table 1. Overview of Review Criteria, continued.

<table>
<thead>
<tr>
<th>8. Schedule and Deliverables</th>
<th>Extent to which the proposed schedule demonstrates the sequence and timing of project tasks, milestones, and deliverables and is sufficiently detailed and reasonable.</th>
</tr>
</thead>
<tbody>
<tr>
<td>9. Budget</td>
<td>Extent to which the proposed budget is appropriate to the work proposed, cost effective, and sufficiently detailed to describe project costs.</td>
</tr>
<tr>
<td>10. Cost Share Funds</td>
<td>Extent to which the proposal leverages other state funds or provides private, federal, or local funding match.</td>
</tr>
<tr>
<td>11. Project Readiness</td>
<td>Anticipated duration between the projected date of an executed agreement and the start of the project implementation/construction.</td>
</tr>
<tr>
<td>12. Environmental Compliance</td>
<td>Extent to which the proposed approach to ensure compliance with all applicable environmental review and permitting requirements is adequate, sufficiently detailed, and reasonable/feasible.</td>
</tr>
<tr>
<td>13. Co-Benefits – Description</td>
<td>Extent to which the proposed project provides multiple benefits; the objectives related to those co-benefits are clearly stated, and where feasible, are measurable and quantifiable; and likelihood that the claimed co-benefits will be realized.</td>
</tr>
<tr>
<td>14. Project Outcomes – Significance of the Benefits</td>
<td>Extent to which the proposal provides sufficient analysis and documentation to demonstrate the significance (e.g., magnitude, diversity) of the proposed objectives.</td>
</tr>
<tr>
<td>15. Project Outcomes – Durability of Investment</td>
<td>Extent to which the proposed project will deliver sustainable outcomes in the long-term.</td>
</tr>
<tr>
<td>16. Climate Change Considerations</td>
<td>Extent to which climate change considerations were taken into account in the proposal (i.e., applicant has considered how future climate conditions might affect the project’s long-term impacts or benefits).</td>
</tr>
<tr>
<td>17. Scientific Merit – Scientific Basis</td>
<td>Extent to which the scientific basis of the proposed project is clearly described and based on best available science.</td>
</tr>
<tr>
<td>18. Scientific Merit – Enhance Scientific Understanding</td>
<td>Extent to which the proposed project will address key scientific uncertainties and fill important information gaps.</td>
</tr>
<tr>
<td>19. Monitoring and Assessment</td>
<td>Extent to which the proposal demonstrates a clear and reasonable approach for monitoring, assessing, and reporting the effectiveness of the project.</td>
</tr>
</tbody>
</table>
Table 1. Overview of Review Criteria, continued.

### 20. Data Management and Access
Extent to which the proposal demonstrates the means by which data collected by the project will be managed and made publicly available. Refer to Section 3.6 for additional data submission requirements pertinent to water quality and watershed data.

#### 4.3.3 Independent Scientific Review
Depending on the scope and nature of each solicitation, the review process may be expanded to encompass an independent scientific review. In such instances, each eligible and complete proposal will be evaluated by at least two independent scientific reviewers. Independent scientific experts will be selected to review each proposal based on their expertise in the subject areas of the proposal, consistent with CWC Section 79707(f). The approach and criteria upon which the independent scientific reviewers will evaluate the proposals will be documented in the solicitation.

#### 4.3.4 Selection Panel
Following completion of the technical and/or independent scientific reviews of all eligible and complete proposals, CDFW will convene a Selection Panel to review the scores and comments. Representatives from other agencies/organizations may be invited to participate on the Selection Panel. The Selection Panel will prepare a ranking list of the proposals and make funding recommendations. When developing the ranking list, the Selection Panel will consider the following items:

- Proposal review scores and comments
- Amount of funds available
- Program purposes (refer to Section 1.4)
- Distribution of funding within focus areas
- Results of coordination and consultation with the Delta city or Delta county in which a grant is proposed to be expended or an interest in real property is proposed to be acquired (CWC §79738[b]).

The Selection Panel may recommend modifications, including reducing grant amounts from that requested, in order to meet current and any potential future program preferences, funding targets and available funding limitations.

#### 4.3.5 Director Review and Action
The Selection Panel's final recommendation will be presented to the Director of CDFW. The Director will consider the comments and recommendations from all levels of the review process and make the final funding decision. Following approval by the Director, the selected grant recipients will receive a commitment letter officially notifying them of their selection and grant amount.
4.4 Grant Agreement

Development of grant agreements will begin as soon as projects are approved by the Director of CDFW. Successful applicants will work with an assigned CDFW Grant Manager to develop the grant agreement. The applicant must agree to the General Grant Provisions which will be provided at the time of the solicitation. Agreements that are not executed within six months of the award announcement may not be funded. In such situations, the applicant may apply to a future solicitation.

Grant agreements are not executed until signed by both the authorized representative of the grant recipient and CDFW. Work performed prior to an executed agreement is done at the risk of the applicant and cannot be reimbursed.

4.4.1 Responsibility of the Grantee

The Grantee will be responsible for carrying out the work agreed to and for managing finances, including but not limited to, invoicing, payments to subcontractors, accounting and financial auditing, and other project management duties including reporting requirements. All eligible costs must be supported by appropriate documentation. The solicitation shall describe the documentation required to support cost claims. See Appendix C for additional state auditing requirements (refer to CWC §79708[b-c]).

4.4.2 Invoicing and Payments

Grant agreements, with the exception of acquisition grants, will be structured to provide for payment in arrears of work being performed. Funds cannot be disbursed until there is an executed grant agreement between CDFW and the project applicant. Payments will be made on a reimbursement basis (i.e., the Grantee pays for services, products or supplies, submits an invoice that must be approved by the grant manager, and is then reimbursed by CDFW). Funds for construction cannot be disbursed until all of the required environmental compliance is complete.

4.4.3 Loss of Funding

Work performed under the grant agreement is subject to availability of funds through the State’s normal budget process. If funding for the grant agreement is reduced, deleted, or delayed by the Budget Act or through other budget control actions, CDFW shall have the option to either: cancel the grant agreement, offer to the Grantee a grant agreement amendment reflecting the reduced amount, or to suspend work. In the event of cancellation or suspension of work, CDFW shall provide written notice to the Grantee and be liable for any work completed pursuant to the agreement up to the date of the written notice and shall have no liability for payment for work undertaken after such date. In the event of a suspension of work, CDFW may remove the suspension of work through written notice to the Grantee. CDFW shall be liable for payment for work completed from the date of written notice of the removal of the suspension of work.
forward, consistent with other terms of the grant agreement. In no event shall CDFW be liable to the Grantee for any costs or damages associated with any period of suspension invoked pursuant to this provision, nor shall CDFW be liable for any costs in the event that, after a suspension, no funds are available and the grant agreement is then cancelled based on budget contingencies.

Actions of the State that may lead to suspension or cancellation include, but are not limited to:

- Lack of appropriated funds;
- Executive order directing suspension or cancellation of grant agreements; or
- Departmental or California Natural Resources Agency directive requiring suspension or cancellation of grant agreements.

Actions of the Grantee that may lead to suspension or cancellation of the grant agreement include, but are not limited to:

- Failing to execute an agreement with CDFW within six months;
- Withdrawing from the grant program;
- Failing to acquire land at an approved fair market value;
- Losing willing seller(s);
- Failing to submit required documentation within the time periods specified in the grant agreement;
- Failing to submit evidence of environmental or permit compliance as specified by the grant agreement;
- Changing project scope without prior approval from CDFW;
- Failing to complete the project;
- Failing to demonstrate sufficient progress; or
- Failing to comply with pertinent laws.

4.4.4 Standard Conditions

CDFW will attach the General Grant Provisions to the grant agreement at the time of the grant agreement development. The General Grant Provisions may include information regarding audits, amendments, liability insurance and rights in data.

Water Conservation and Efficiency Plans
APPENDIX B – GLOSSARY OF TERMS

Applicant – the entity that is formally submitting a grant application. This is the same entity that would enter into an agreement with the State should the grant application be funded. The grant applicant must be an eligible entity.

Application – the individual application form and any required attachments for grants pursuant to this grant program.

Eligible costs – expenses incurred by the grantee during the agreement performance period of an approved agreement, which may be reimbursed by the CDFW.

Eligible entity – means public agencies, nonprofit organizations, public utilities, federally recognized Indian tribes, state Indian tribes listed on the Native American Heritage Commission's California Tribal Consultation List, and mutual water companies (CWC §79712[a]).

Grant agreement – an agreement between CDFW and the grantee specifying the payment of funds by the CDFW for the performance of the project scope within the term of the agreement by the grantee.

Grantee – refers to the applicant once a proposal is awarded and a grant agreement is executed (i.e., a grant recipient).

Nonprofit organization – means an organization qualified to do business in California and qualified under Section 501(c)(3) of Title 26 of the United States Code (CWC §79702[p]).

Performance measure – a quantitative measure used to track progress toward project objectives/desired outcomes.

Project – refers to an effort included in the proposal. It may include construction of physical facilities or implementation of non-structural actions.

Proposal – refers to the application of a project that is proposed for funding.

Public agency – means a state agency or department, special district, joint powers authority, city, county, city and county, or other political subdivision of the state (CWC §79702[s]).
Review Criteria – set of requirements used to evaluate a proposal for a specific solicitation.

Selection Panel – a group of CDFW representatives at the supervisory or management level assemble to review and consider the evaluations of all complete and eligible proposals and to make initial funding recommendations. Representatives from other agencies/organizations may also be invited to participate on the Selection Panel.

Technical Reviewers – a group of individuals assembled to evaluate the scientific and technical merit of a proposed project. May include representatives from CDFW, other agencies, or other outside experts. Individuals selected to serve as technical reviewers will be professionals in fields relevant to the proposed project (CWC §79707[f]).
APPENDIX C – STATE AUDITING REQUIREMENTS

The list below details the documents/records that State Auditors may need to review in the event of a Grant Agreement being audited. Grant Recipients should ensure that such records are maintained for each State funded Program/Project. For additional details including specific audit tasks performed during a bond audit, see the California Department of Finance Bond Accountability and Audits Guide and the Bond Audit Bulletins (www.dof.ca.gov/osae/prior_bond_audits/).

State Audit Document Requirements

**Internal Controls:**

1. Organization chart (e.g. Grant Recipient’s overall organization chart and organization chart for the State funded Program/Project).
2. Written internal procedures and flowcharts for the following:
   a. Receipts and deposits
   b. Disbursements
   c. State reimbursement requests
   d. State funding expenditure tracking
   e. Guidelines, policies, and procedures on State funded Program/Project
3. Audit reports of the Grant Recipient’s internal control structure and/or financial statements within the last two years.
4. Prior audit reports on State funded Program/Project.

**State Funding:**

1. Original grant agreement, any amendment(s) and budget modification documents.
2. A list of all bond-funded grants, loans or subventions received from the State.
3. A list of all other funding sources for each Program/Project.

**Agreements:**

1. All subcontractor and consultant contracts and related documents, if applicable.
2. Agreements between the Grant Recipient, member agencies, and project partners as related to the State funded Program/Project.

**Invoices:**

1. Invoices from vendors and subcontractors for expenditures submitted to the State for payments under the Grant Agreement.
2. Documentation linking subcontractor invoices to State reimbursement requests and related Grant Agreement budget line items.
3. Reimbursement requests submitted to the State for the Grant Agreement.

**Cash Documents:**

1. Receipts (copies of warrants) showing payments received from the State.
2. Deposit slips or bank statements showing deposit of the payments received from the State.
3. Cancelled checks or disbursement documents showing payments made to vendors, subcontractors, consultants, and/or agents under the Grant Agreement.

**Accounting Records:**

1. Ledgers showing receipts and cash disbursement entries for State funding.
2. Ledgers showing receipts and cash disbursement entries of other funding sources.
3. Bridging documents that tie the general ledger to reimbursement requests submitted to the State for the Grant Agreement.

**Administration Costs:**

1. Supporting documents showing the calculation of administration costs.

**Personnel:**

2. List of all contractors and Grant Recipient staff that worked on the State funded Program/Project.
3. Payroll records including timesheets for contractor staff and the Grant Recipient's

**Project Files:**

1. All supporting documentation maintained in the Program/Project files.
2. All Grant Agreement related correspondence.
