*Refer to Class Code Assignment below.

OVERVIEW:

Under general supervision, Allied Health Services Providers have primary responsibility to provide health care services offered by the Student Health Center that are elective or specialized in nature and not included in a physician classification.

TYPICAL ACTIVITIES:

Allied Health Services Providers perform patient evaluation and treatment activities appropriate to their training and area of specialty, and within the scope of practice outlined by the corresponding California state licensing boards or relevant certification agency, and with CSU Executive Order 943 or successor executive order. The following examples illustrate the general range of work functions performed by an Allied Health Services Provider within the Student Health Center; they are not meant to be all-inclusive or restrictive. Work assignments may vary and involve related activities to support Student Health Center operations.

- ◆ Obtain patient history, examine and evaluate patients or clients, order and interpret necessary testing, formulate and administer treatment plans; refer to other health care professionals as needed; counsel and educate patients on related problems and health measures; and follow-up on treatment to promote and confirm the appropriate resolution of a problem or injury. If authorized by the CA license scope, may perform minor surgeries not requiring general anesthesia.
- ◆ Consult with private health professionals and public agencies in securing treatment for patients requiring services beyond those available in the Student Health Center. Refer mental health issues to the Primary Care Clinic or University Counseling.
- ◆ Collaborate with management on how best to meet the health care needs of the campus population.
- ◆ May be assigned to direct and oversee specific functions within the Student Health Center relevant to their specialty, e.g. Dental or Optometry Clinics. May participate in student health center or campus committees, and the campus health and safety program as appropriate for their training, expertise, and scope of practice.
- ◆ Assists as appropriate within the scope of practice for the stabilization and transport of acute medical situations.

CLASS CODE ASSIGNMENT:

- ◆ *Allied Health Services Provider (A)* – Use this class code (7754) for incumbents providing allied health services such as Optometry and Dentistry.

-
- ◆ *Allied Health Services Provider (B)* – Use this class code (7755) for incumbents providing allied health services such as Chiropractic and Acupuncture.
 - ◆ *Allied Health Services Provider (C)* – Use this class code (7756) for incumbents providing allied health services such as Podiatry.

TYPICAL QUALIFICATIONS:

Knowledge and Abilities:

Thorough knowledge of and the ability to effectively and efficiently apply the principles and methods essential to the assigned services, and in the diagnosis and treatment of disorders related to the area of practice; access to and understanding of community resources in health services in their area of practice; knowledge of current public health practices relevant to their practice scope; thorough knowledge of local, state, and national laws and regulations pertaining to the area of practice; thorough knowledge of applicable professional ethics standards and patient privacy; ability to serve as a mentor and resource consultant in their specialty for other health center personnel; and the ability to establish and maintain effective working relationships with a variety of medical practitioners and specialists, as well as students, administrators, staff, and faculty.

Experience and Education:

Graduation from a school or training program recognized by the relevant State of California licensing agency or board. Completion of one or more accredited training programs in the specialty appropriate to the assigned duties.

License and Certification Requirements:

- ◆ Possess and maintain a valid professional license or certification required to practice in the State of California appropriate for the assigned duties.
- ◆ When appropriate and relevant to the scope of practice, may be required to possess and maintain a valid Drug Enforcement Agency (DEA) registration and number for prescribing controlled substances.
- ◆ Current cardiopulmonary resuscitation and automated external defibrillator (CPR/AED) certification as appropriate for the assigned duties.
