Understanding the Construction Cost Catalog®

- Is a CONTRACT DOCUMENT
- Contractor must review and understand “Using the Construction Task Catalog®”
- Rules of the game
- Make sure you get paid for all appropriate tasks
- Pages 00 – 1 to 00-6 of the CTC
Understanding the Construction Cost Catalog®

General Rules:
• Unit Prices are for Complete and In-Place Construction
• Unit Prices Include Labor, Material and Equipment. Do Not Add Labor to Repointing Task
• Unit Prices Include the Cost of Delivery to Project Site, Unloading, Storage and Handling. Delivery Height is up to 2 ½ Stories
• Unit Prices Include Testing, Calibration, Balancing, Etc.
• Unit Prices Include all Fasteners, Bolts, Anchors, Adhesives, Etc. For New Work
• Unit Prices for Tasks Such as Windows, Doors, Frames, Countertops, Etc. Include Sealant and Caulk
Contractors **Do Not** Get Paid Separately For:

- Moving and Returning Furniture Occupying Less than 55% of Floor Area. For Example, Moving Classroom Furniture to Paint.
- Labor for Protecting Work in Place. For Example, a Laborer to Stay After a Concrete Pour.
- Minor Barricades and Signage.
- Portable Toilet, Field Office, Field Office Equipment for Contractor’s Use.
- Layout, Site Engineering for the Work Itself.
Non Pre-Priced Tasks

- Contractor **must** have permission from the University to use a Non Pre-Priced Task prior to submission
- Three (3) Quotes on vendors’ or subcontractors’ letterhead
- Justification for less than three (3) Quotes
- Contractors mark-up is a set NPP Factor. Normal working hours times 15% with a maximum factor of 1.1500.
JOC Process

- **Step 1:** Joint Scope Meeting
- **Step 2:** Request for Proposal
- **Step 3:** Price Proposal
- **Step 4:** Price Proposal Review
- **Step 5:** NTP / JOA Issued
- **Step 6:** Construction Starts
Detailed Scope of Work

- This documents a thorough account of activities the contractor must perform to complete the job.
  - Collaborative document between owner and contractor
  - Defines the project’s scale, location, and description
  - Details out items such as paint color, types of materials, strength of concrete required, etc.

- An agreed Scope of Work is very important! This is a prime opportunity for the contractor and campus to dissect the project into smaller details and produce an agreed scope of work to be used to build an accurate price proposal.
Contractor Adjustment Factor

Importance of Adjustment Factors

- Determines Lowest Bidder AND
- Used to Price Individual Work Orders
- Price Proposal Total Becomes the *Lump Sum Job Order Amount*

\[
\text{Unit Price} \times \text{Quantity} \times \text{Adjustment Factor} = \text{Total for Task}
\]

\[
\text{Total Job Order Price}
\]
Adjustment Factors

Adjustment Factors include (but not limited to):
- All overhead, profit and taxes for the contractor and subcontractor
- Prep and modifications of proposals
- Office trailers and portable toilets
- Construction vehicles and storage devices
- All PPE
- Daily and final clean-up
- Protection of all surfaces
- Site Supervision and management meetings

*Please review Understanding the Construction Cost Catalog® for comprehensive listing*
Cost Escalation

- Per the General Conditions, the contractor is responsible for changes in material and labor costs throughout the term of the contract.
- The contractor is required to **plan for escalation** at the time of the bid.
- Contractor cannot come back for additional compensation to cover escalation.
Risks of Low Adjustment Factor

- Leads to Arguments in Proposal Review
  - Unsupportable Tasks
  - Exaggerated Quantities
- Leads to Delays in Work Order Development
  - Takes Longer to Review Proposals
- Creates an Adversarial Relationship
  - Reduced Volume of Work
  - Will Shorten Contract
  - Lost Profitability
- No Second Chance to Improve your Margin
Method to Calculate Factors

1. Use Historical Project Data
2. Select a Completed Project You Know Scope and Direct Costs
3. Price Project From CTC
4. Add on Overhead and Profit
5. Calculate the Adjustment Factor
