***RATIONALE:** Engaging in an examination of General Education (GE) across the system as described in Executive Order 1100 (2015) is a prudent means by which we maintain currency and identify best practices across the system. In addition, GE is under increasing interest by external stakeholders, and has undergone recent changes within the Western Association of Schools and Colleges (WASC) accreditation guidelines. Because it is solely the purview of the faculty, it seems reasonable and healthy for the ASCSU to engage in an examination of GE every several years. The intent of this task force is to inform stakeholders, faculty, campuses, and the system about GE curriculum.*
