

CSU

The California State University

OFFICE OF THE CHANCELLOR

**PRELIMINARY
FIVE-YEAR PLAN**

2024/2025 through 2028/2029

Capital Planning, Design and Construction
Office of the Chancellor
401 Golden Shore
Long Beach, California 90802

The Basis of the Five-Year Plan

The primary objective of the Five-Year Plan for the California State University (CSU) is to provide facilities appropriate to the CSU's approved educational programs to create environments conducive to learning, and to ensure that the quality and quantity of facilities at the 23 universities serve the students equally well.

The universities and the CSU Office of the Chancellor (Chancellor's Office) have enlisted broad participation by administrators, faculty, and students in the development of the Five-Year Plan. The Five-Year Plan has the following basis:

1. **Approved Academic Master Plans**

The Board of Trustees has adopted dynamic planning policies designed to promote orderly curricular development, guide the distribution of programs in the system, and facilitate the progress of each university in fulfilling the mission of the CSU as expressed in the statewide master plan for higher education. These policies, first published in the *1963 Master Plan for the California State Colleges*, are still in effect. The policies are summarized below:

- Curricula are to reflect the needs of students and of the state.
- The foundation program for each university in the system consists of the liberal arts and sciences, business administration, and education. (The Board of Trustees specified subject areas that were to be regarded as the "Broad Foundation Program".)
- Programs in applied fields and professions other than those listed above are to be allocated within the system on the basis of (1) needs of the state, (2) needs of the university service area, and (3) identification of employment opportunities.
- "All universities cannot be all things to all people." Curricula in the applied fields and professions are therefore to be located in a systemwide pattern that will achieve an equitable and educationally sound distribution of programs throughout the state.
- Although many universities may wish to offer the same programs, the Board of Trustees exercises great selectivity in final approval of new curricula.
- Specialized, high-cost programs are to be allocated on the basis of review and study of the individual subject area.

Subsequent policies adopted by the Board of Trustees include the following:

- Degree programs are to be broadly based and of high academic quality.
- Unnecessary proliferation of degrees and terminologies is to be avoided.
- A formal review of existing curricula is to be conducted by each university as part of the overall planning process.
- The Academic Master Plans serve as the basis for campus master planning of facilities.
- The ability to accommodate the latest instructional technology will be included in the planning for construction of all new and renovated instructional buildings.

2. **Approved Campus Physical Master Plans**

The Board of Trustees has long recognized the importance of each university developing a physical master plan, in concert with the consulting campus architect and members of the local community. The Board of Trustees requires that every university have a physical master plan showing existing and anticipated facilities necessary to accommodate a specified academic year full-time equivalent student (FTE) enrollment at an estimated target date, in accordance with approved educational policies and objectives. Each master plan reflects the ultimate physical requirements of academic programs and auxiliary activities on the campus. In developing the plan, the university considers costs and benefits, functionally related disciplines and activities, instructional support needs, and environmental impact, including vehicular and pedestrian traffic flow.

The Basis of the Five-Year Plan (continued)

3. Full-Time Equivalent Student Enrollment Allocations

The program is based on the annual full-time equivalent student college-year enrollment targets that are prepared by the Chancellor's Office in consultation with the universities. College-year FTE enrollment targets include state-supported summer term enrollments, in accordance with Board of Trustee policy. A full-time equivalent student is based on student level and credit units attempted for a term: an undergraduate and post baccalaureate student is defined as 15 units of coursework and a graduate student is defined as 12 units of coursework.

4. Approved Space and Utilization Standards

Instructional space needs are calculated in conformity with space and utilization standards approved in September 1966 by the Coordinating Council for Higher Education (replaced by the California Postsecondary Education Commission) as modified in March 1971 and June 1973. In keeping with these established space standards, classroom station size is defined as 15 square feet per station. The table below displays the currently approved utilization standards:

	<u>Hours/Week</u>	<u>Station Occupancy</u>	<u>Station Use</u>
Lecture Classrooms	53.0	66%	35.0
Teaching Laboratories, Lower Division	27.5	85%	23.4
Teaching Laboratories, Upper and Graduate Divisions	22.0	80%	17.6

Detailed standards can be found at: <https://calstate.policystat.com/policy/6874149/latest/>.

5. Space and Facilities Database

The database is an inventory maintained by each campus to manage and plan for space and facilities. The facilities data includes (but is not limited to): the facility number, name, number of floors, gross (GSF) and assignable (ASF) square feet, master plan status, and cost. The space data file describes the current use of the space and includes space type, discipline, instructional level, station count and type, and department code (among others). CSU policy in regards to station size follows the California Building Code (CBC) occupant load factors per the programmed space function (15 ASF/Station Classroom, 20 ASF/Station Flexible Lab, 50 ASF/Station Wet Lab).

Annual companion reports to the Five-Year Plan are the "Summary of Campus Capacity" and the "Laboratory Enrollment FTE vs. Laboratory Capacity FTE".

6. Phasing Out of Leased and Temporary Facilities

Board of Trustees policy is to phase out all leased and temporary facilities on campus as soon as funding can be secured for replacement structures.

7. Estimates of Cost Based on the ENR California Construction Cost Index 10461 and EPI 5000

Cost estimates are based on the *Engineering News Record* California Construction Cost Index (CCCI). The CCCI is the average Building Cost Index for Los Angeles and San Francisco as published in the *Engineering News Record*. The CCCI is the index required by the Department of Finance (DOF).

8. Seismic Policy and Program

- It is the policy of the Board of Trustees that, to the maximum extent feasible by present earthquake engineering practice, the CSU acquire, build, maintain, and rehabilitate buildings and other facilities that provide an acceptable level of earthquake safety for students, employees, and the public who occupy these buildings and other facilities at all locations where university operations and activities occur.

The Basis of the Five-Year Plan (continued)

- Independent technical peer reviews of the seismic aspects of all new and renovated construction projects will be performed, starting from their design initiation, for conformance to good seismic resistant practices consistent with this policy.
- The CSU Seismic Review Board (SRB) was established in 1992. The SRB advises the CSU of actions necessary to provide reasonable life safety protection and to achieve an acceptable level of seismic risk for CSU buildings. The SRB performs surveys and has identified buildings that need seismic investigation, prioritizes that list based on the structure and local site conditions, and updates the list based on new information or code changes. Buildings in the Five-Year Plan that contain a seismic-strengthening component are denoted in the title “(Seismic)”.
- A five-year summary of proposed projects is prepared as part of the Preliminary Five-Year Plan to identify university priorities to strengthening facilities.

9. Sustainable Building Practices

The Board of Trustees has established policies to ensure that all CSU new construction, remodeling, renovation, and repair projects will be designed with consideration of optimum energy utilization and minimizing carbon emissions resulting in low life cycle operating costs, and compliance with applicable energy codes and regulations. Progress submittals during design are monitored for individual envelope, indoor lighting, and mechanical system performances. The CSU Mechanical Review Board (MRB) was established in February 2004. The MRB considers proposed building designs for conformance with code and energy efficiency practices. The peer review and consultation on individual capital projects promotes effective design and sustainable operations. This goal is further advanced by the calculation and reporting of the effect of individual projects on Greenhouse Gas (GHG) production. The Five-Year Plan reporting forms provide for the tracking of project related GHG on an annual basis. Progress towards attainment of the 2020 and 2040 emission reduction goals is reflected in these projections of the five-year capital improvements such as renovations that incorporate enhanced building metering and controls.

10. Projects Included in the Five-Year Plan

Each year the Board of Trustees approves projects to be included in the Five-Year Plan. The list of approved projects is then submitted to the Department of Finance for their approval. Projects funded with CSU debt financing or reserves require only those two approvals. Projects to be funded with state-supported bond funds require the additional step of being included in an enacted California State Budget. Due to the limited funding available for both academic projects and the infrastructure improvement projects, not all of the approved projects are funded. Projects included in the current version of these lists that are in *italics* have previously received approval from the Board of Trustees, and projects in *red italics* have received prior approval from both the Board of Trustees and Department of Finance. Because these projects have already been approved, they are included in the current Five-Year Plan in order to identify their need for funding and provide information on the current outstanding systemwide priority needs and not for specific project approval.

Expanded Finance Authority

1. General

In November 2014, the CSU Board of Trustees approved revisions to the CSU Policy for Financing Activities (RFIN 03-02-02) in order to implement capital financing authorities granted by state statute in June 2014 (Education Code Section 89770). The authority enables broader use of operating funds to pay for, or finance, capital outlay projects. It also establishes a streamlined process for the state and legislature’s review of proposed projects. While authority was increased, there were limited new revenues provided to the CSU to pay for the backlog of deferred maintenance and capital outlay needs across the 23-university system.

The Basis of the Five-Year Plan (continued)

To enable the CSU to finance academic and instructional support projects, the authority permits the CSU to pledge its annual general fund support appropriation and any other revenues to secure CSU debt issued pursuant to the State University Revenue Bond Act of 1947 (Bond Act). Under this provision, CSU can use the existing Systemwide Revenue Bond (SRB) program in support of all forms of capital improvements and to refinance State Public Works Board bond debt.

The prioritization of university projects eligible for financing under the new authorities will remain a centrally managed function of the Chancellor's Office, which will evaluate university needs and provide recommendations to the Board of Trustees on project priorities.

The Board of Trustees has authorized two multi-year financing plans to support CSU's ongoing capital improvement program; one in November 2016, and one in November 2018.

These multi-year financing plans will provide up to \$2.1 billion dollars toward funding projects.

The projects included in this Five-Year Plan will exceed the total Board-approved funding levels.

2. 2024-2025 Priority List Project Funding

- **Academic Projects** – On-campus and off-campus projects, including academic, administrative, and infrastructure support projects may be approved as funded with CSU designated reserves or debt financing. Projects may be financed through a multi-source structure under the authority of the Bond Act. Per Board of Trustees policy, universities are encouraged to contribute at least 10 percent of project costs from reserves to help stretch the system's limited resources to fund deferred maintenance and capital improvement needs, help to expedite completion of the project design and/or facilitate a project's inclusion in a future bond sale. University funds may be used to co-fund project design (preliminary plans and working drawings), construction and/or provide furnishings, fixtures and/or moveable equipment. A university president may also propose academic projects financed by donor or grant funds, or with an auxiliary organization or third-party financing.
- **Self-Support Program** – To use the resources of CSU in the most cost effective and prudent manner, all revenue-based on-campus student, faculty, and staff rental housing, parking, student union, health center, and continuing education capital projects will be financed by the Board of Trustees using a broad systemwide multi-source revenue pledge under the authority of the Bond Act in conjunction with the respective authority of the Board of Trustees to collect and pledge self-support revenues. Projects that primarily serve student support functions and are supported by mandatory fees, user charges, gifts, and bonds issued by the Board of Trustees or auxiliary organizations will be classified as Self-Support projects in the Five-Year Plan, thereby replacing the historical term of "Non-State" used to describe projects not appropriated by the legislature. Planning guidelines for self-support projects require financial plans and market studies, when applicable, to establish the operational viability of proposed self-support funded capital outlay projects.
- **Fund Types** – The Five-Year Plan may thus propose project funding from multiple sources including designated campus maintenance and capital reserves funds, state funds, donor funds, third-party funds and/or self-support program funds. The list of categorical fund types has been expanded to help track the various fund sources. The expanded list incorporates the use of university reserves designated for capital use per the change in CSU's funding authority in June 2014.

The Basis of the Five-Year Plan (continued)

3. Categories of Project Funds

To help track the various types of available funding sources, we have expanded the number of categories. The Fund codes now include:

ASH	Student Housing Grants – State
ASI	Associated Students Incorporated
Aux	Auxiliary/Foundation
Campus-I	Designated Campus Reserves – Improvements
Campus-M	Designated Campus Reserves – Maintenance
CE	Continuing Education
CSU	CSU Reserves
DM	Deferred Maintenance – State
Don	Donor
Eng	Energy/Power Purchase Agreements
FH	Faculty/Staff Housing
Gra	Grants
Hlth	Health Center
OTS	One-Time State Funding
Pkg	Parking
PPP	Public-Private/Public Partnership
S	General Obligation Bond and Public Works Board Revenue Bond – State
SH	Student Housing
SRB-AP	Systemwide Revenue Bonds – Academic Program
SRB-SS	Systemwide Revenue Bonds – Self-Support
TRP	Total Return Portfolio

4. Delegation of Capital Outlay Project Approval and Schematic Design Approval

In March 2018, the Board of Trustees revised its Standing Orders for delegated authority for capital outlay projects to include the following:

- A. *Authorize the chancellor to approve the capital outlay project scope, budget, and schematic design for projects with a value of \$40 million or less.*
- B. *Authorize the chancellor to approve the schematic design for all remodels, parking structures, and utilitarian projects, regardless of cost, unless the project requires an Environmental Impact Report or includes significant unavoidable environmental impacts.*

The university shall submit all major capital projects up to \$40 million to the Assistant Vice Chancellor, Capital Planning, Design and Construction, for consideration of delegated review and approval of scope, budget, schematic design, insurance coverage, master plan revision, CEQA action, and amendment to the annual capital program, as applicable.

Categories and Criteria to Set Capital Program Priorities

General Criteria

Capital priorities will be determined based upon the strategic needs of the system in consideration of existing deficiencies of campus space to serve the academic master plan. Priority will be given to projects that address critical seismic and infrastructure deficiencies, including fire/life safety, utility infrastructure critical to campuswide operations, reductions in GHG emissions, and deferred renewal in existing facilities. Projects to modernize existing facilities or construct new replacement buildings in response to academic needs or enrollment demand will be considered on a case-by-case basis. Universities are encouraged to identify funding sources for projects that reduce total project financing costs to receive priority consideration; however, additional funding does not guarantee a higher prioritization for the project based on the strategic needs of the system.

A university may submit a maximum of one major debt financed academic facility or academic support project for the 2024/2025 action year. Up to three academic projects and three self-support projects per year can be proposed for the 2025/2026 through 2028/2029 planning years, including health and safety projects. This approach aims to encourage universities to identify their facility needs and not impose a one-project limit across all five years that may inadvertently understate the true funding level needed for academic and self-support project funding.

Projects submitted for inclusion in the Systemwide Infrastructure Improvement program, equipment, seismic strengthening, donor-funded projects, certain public-private-partnerships, and reserve-funded projects are excluded from the project limits. Exceptions to these limits will also be considered on an individual project basis. Seismic strengthening projects will be prioritized according to recommendations from the CSU Seismic Review Board.

Approval of multi-phase projects may require the project funding to be allocated over more than one year. Universities are encouraged to use designated capital reserves to co-fund projects. University requests for preliminary plans, working drawings, and construction (PWC) lump sum funding will be considered on an individual project basis based on its complexity, scope, schedule, and the availability of university funds to co-fund the project.

Current Board of Trustee-approved physical master plan enrollment ceilings apply to on-campus seat enrollment only. These numbers are to be used as the basis of comparison for justifying capital projects that address enrollment demand to be accommodated on campus. Enrollment estimates that exceed these figures should be accommodated through distributed learning, state-supported summer session, and other off-campus instructional means. Campus utilization of space, along with relative deficits of space, demand for space and/or deficiencies of space will also be considered.

Individual Categories and Criteria

Projects will be placed within each category based on the established criteria and predominant purpose of the project.

I. Existing Facilities/Infrastructure

A. Critical Infrastructure Deficiencies – CD (Critical Deficiencies)

These projects correct structural and health and safety code deficiencies by addressing fire and life safety problems and promoting code compliance in existing facilities. Projects include seismic strengthening, correcting building code deficiencies and failing infrastructure, and addressing regulatory changes which impact campus facilities or equipment. This category also includes the systemwide Infrastructure Improvements program.

Categories and Criteria to Set Capital Program Priorities (continued)

B. Modernization/Renovation – FIM (Facilities Infrastructure/Modernization)

These projects modernize existing facilities or construct new replacement buildings in response to academic and support program needs; and replace utility services/building systems to improve facilities and the campus infrastructure. This category includes group II equipment (furnishings) to make remodeled and replacement facilities operable.

II. Growth/New Facilities – ECP (Enrollment/Caseload/Population)

These funds eliminate instructional and support deficiencies to support university growth, including new buildings and their group II equipment, additions, land acquisitions, and site/infrastructure development.

**Statewide Program
Five-Year Plan 2024/25 through 2028/29**

Infrastructure Improvements Program

This program addresses California State University (CSU) priority infrastructure needs. Projects in this Program include various facilities and distribution systems across all universities and the CSU Office of the Chancellor. Critical deficiencies identified throughout the system will be addressed to enable continuation of essential operations, reduce the likelihood of catastrophic failures, and meet current code requirements to operate safe facilities and improve resiliency. Major building systems will be modernized to enable universities to operate utilities more effectively, improve HVAC systems efficiency, reduce energy and lighting costs, reduce water consumption and greenhouse gas emissions, and extend the useful life of existing facilities. Funds will provide for Life Safety/Security upgrades across campuses which may include hardening of door hardware, deployment of security cameras, increased security communications coverage, and technology upgrades. Systemwide resources will also provide for seismic studies across campuses to help identify buildings that need strengthening.

Deferred Maintenance

This program will address the university’s highest priority deficiencies in deferred maintenance, infrastructure, and building system renewal. The CSU estimated renewal backlog of systems past their useful life, including buildings and critical infrastructure, is estimated at \$7.4 billion. The projected additional systemwide 10-year average annual building and infrastructure renewal need is \$344 million per year. In order to eliminate our backlog over the next 10 years, the CSU would require an annual investment of \$1.1 billion. These estimates are based on Facility Condition Assessments completed for individual facilities to estimate building system needs, and infrastructure needs from Critical Infrastructure and Life Cycle assessments.
