If the "% SABRC Compliant" rate (column 4) is less than 50% for a category, please provide an explanation. An explanation for all deficient categories is important during the review of your annual report. In addition, please include any other relevant information or issues.

Antifreeze is rarely purchased and is often purchased with the PCard and not through procurement. Glass products are purchased by all campuses. It is very difficult to determine whether a glass product contains recycled material. The system will review this issue and see if there is a way to improve monitoring. Recycled lubricating oils are rarely purchased. The need for recycled oil needs to be communicated to end-users. Paint with a recycled component is rarely purchased. It is not generally available and there is a perception that it is of inferior quality to the recycled product. Recycled tires are rarely purchased due to the belief that they are subject to dangerous failures.

Contracts and Procurement

State agencies must procure post-consumer recycled content products whenever feasible, including as part of contracts. Each state agency shall require the businesses with whom it contracts to use, to the maximum extent economically feasible in the performance of the contract work, recycled products. Please refer to [Public Contract Code Section 12200-12217](#). State agencies should track all applicable purchases within [Statewide contracts or leveraged procurement agreements](#).
