## RE: Academic Preparation of First-Year Students

As one of the six pillars of the California State University's Graduation Initiative 2025, academic preparation addresses the need to ensure that all students - including those who arrive to the CSU requiring additional academic support - have the opportunity to earn the necessary academic credit before their second academic year and, ultimately, achieve their goal of earning a college degree. This report provides information regarding the academic progress of the fall 2021 first-year freshmen student cohort at the CSU with a focus on general education courses in mathematics and written communication.

As required by Assembly Bill 914 (Weber, 2021), which amended Section 66015.12 of the Education Code, this report provides information regarding the placement of freshmen at each CSU campus for purposes of certain general education requirements. This placement information includes the number of freshmen at each campus, the freshmen's levels of

## CSU Report: Academic Preparation

May 5, 2023
Page 2
placement for general education written communication and mathematics and quantitative reasoning, and an analysis of the factors used by the university in its determination of freshmen's levels of placement. It also includes an analysis of any equity gaps by income, race or ethnicity within and across the university's levels of placement, and the university's ongoing efforts to address such gaps. Prior to the COVID-19 pandemic, the CSU experienced consistent year-over-year progress in number of students meeting the Mathematics and Quantitative Reasoning.

# California State University Report on Academic Preparation of First-Year Students 

## Overview

Academic preparation is essential to student success and is a key pillar of the California State University's (CSU) Graduation Initiative 2025. Students who have been given more learning opportunities in the earliest stages of their academic journey are more likely to have more choices when preparing to enter emerging or high growth professions. As part of the CSU commitment to increasing access to its 23 universities and ensure equity for all students, the system continues to strengthen its efforts to support academic preparation beginning in PK-12 and throughout the undergraduate college experience.

However, the CSU also recognizes the pandemic's disproportionately adverse impact on the state's most underserved students. As a result, the system and its 23 universities are employing an equity lens to re-envision the ways students are supported from their transition from high school to college and in those critical first two years as undergraduates. Recent efforts that reflect this equity focus include the permanent suspension of standardized tests (SATs and ACTs) as part of the CSU's undergraduate admissions criteria and the development of a systemwide Supportive Pathways for First-Year Students program (formerly known as the Early Start Program) to expand first-year support and services beyond summer supportive programs.

This report provides information regarding the academic progress of the fall 2021 first-year freshmen student cohort with a focus on General Education (GE) courses in mathematics and written communication. Prior to the COVID-19 pandemic, the CSU experienced consistent year-over-year progress in number of students meeting the Mathematics and Quantitative Reasoning. The following data tables include the total number of regularly admitted and specially admitted first-time freshmen (Table 1) and those who fall into each of the university's four levels of placement for GE Subarea A2 Mathematics and Quantitative Reasoning and Subarea B4 Written Communication (Table 2). As directed in AB 914 (Weber, 2021), this report provides enrollment figures for this cohort at various stages of their first and second academic years, including data at the system as well as campus levels (Table 3). The report also evaluates the cohort based on the CSU's three factors of assessment for placement of first-year freshmen (course taking, grade point average and test-taking) and the system's student success indictors including persistence to the second academic year and number of completed units (Table 4). The final data table (Table 5) is an analysis of the cohort identifying potential equity gaps by income, race or ethnicity within and across the university's four levels of GE placement.

## Supporting Incoming First-Year Students

The first year of college sets student trajectories that affect their decisions to return for their second year and in subsequent years of their academic journey towards becoming a college graduate. Prior to fall 2018, incoming first-year CSU students were identified as "college-ready" or not "college-ready" based on standardized tests and placement exams. Students identified as not college-ready were required to take, and pass, stand-alone developmental education prerequisite courses that did not confer college credit.

Implemented in fall 2018, Executive Order 1110 (EO 1110) discontinued stand-alone, non-credit bearing developmental education courses. EO 1110 broadened prior used tools used to assess student readiness for first-year college-level courses through the additional use of multiple measures, including high school grade point average and completed English and mathematics courses. It also allowed students participating in the CSU Early Start Program to earn college credit the summer before their first term. As of 2023, the Early Start Program is now the Supportive Pathways for First-Year Students program and allows each of the system's 23 universities to expand and customize what was formally their Early Start Program into services that could expand from the summer before college through the first year of college.

First-time first-year students continue to be placed across four categories to better address their academic needs:

- Category I: Student has fulfilled the GE Subarea A2 or B4 requirement upon arrival

Student has met the CSU GE Breadth Subarea A2 and/or B4 requirement via Advanced Placement (AP) examination, International Baccalaureate (IB) examination or transferable college course.

- Category II: Student placed directly into a GE Subarea A2 or B4 course

Student has met the readiness standards via one or several of the multiple measures-informed standards.

- Category III: Student placed into a supported college-level course

Based on multiple measures, are identified as needing supported instruction through the Supportive Pathways for FirstYear Students program.

- Category IV: Student placed into a supported college-level course

Based on multiple measures, students are identified as needing supported instruction through the Supportive Pathways for First-Year Students program.

## Evaluating Student Outcomes

The data provided in this report reflect outcomes for fall 2021 student cohorts as it relates to first-year college-level mathematics/quantitative reasoning and written communication courses. Information is provided for the total number of students in each cohort, as well as disaggregated data by race/ethnicity and by CSU campus.

## College-Level Mathematics/Quantitative Reasoning Outcomes

In fall 2017, the year prior to enactment of EO $1110,63 \%$ of entering first-time students met this requirement oneyear later. As EO 1110 changes were enacted, the fall 2018 entering class experienced an 11 percentage point increase with $74 \%$ completing the requirement. The fall 2021 student cohort saw an increase in the number of students requiring additional support compared to the previous year. Overall, just under three-quarters of fall 2021 incoming first-time students - or $73 \%$ - met the mathematics/quantitative reasoning B4 requirement.

## College-Level Written Communication

EO 1110 resulted in a reduction in students identified as needing additional preparation in written communication one year later. In fall 2017, $79 \%$ of the entering student cohort met the written communication general education course requirement (A2) in the first year. The following year, that figure increased to $82 \%$ of the fall 2018 entering class. In fall $2021,73 \%$ of the entering class met the A2 requirement.

## Supportive Pathways for First-Year Students

In 2010, the CSU Board of Trustees adopted a resolution creating the Early Start Program. The program continued in various forms through cohorts first enrolling at CSU in fall 2022. Affected by COVID-19 limitations the Early Start Program ran in a highly limited manner during summer 2020, 2021 and 2022. Given the deleterious effects of the pandemic on student learning along with a desire across the CSU's 23 universities for more customized programming responsive to existing supportive instructional models in first-year mathematics and English, in fall 2022, the system in partnership with the campuses have reenvisioned how to better support the academic success of incoming first-year students.
Beginning in summer 2023, the Supportive Pathways for First-Year Students program establishes intentional pathways and support structures that ensure at least $90 \%$ of first-time students successfully complete A2 and B4 (written communications and mathematics) requirements within their first year. The program also encourages programming and services that nurture a strong sense of belonging among students who participate in these programs.

## Conclusion

The CSU remains committed to ensuring the appropriate academic supports are in place in order to improve college readiness, increase degree completion rates and eliminate equity gaps systemwide. The adoption of EO 1110 in 2017 affecting entrants in 2018 and later, fundamentally changed the approach undertaken to assess and place new first-year undergraduate students in college coursework, shifting from a deficit-based model of remediation to an asset-based model of support. Prior to the COVID-19 pandemic, the CSU experienced consistent year-over-year progress in number of students meeting the B4 and A2 first-year courses. With a continued focus on equity, the CSU is leveraging all available resources to address student needs, particularly for historically underserved student populations. The ongoing support of Graduation Initiative 2025, as well as the newly expanded Supportive Pathways for First-Year Students program, will help ensure the university remains a force for social mobility and inclusive excellence now and well into the future.
(1) The total number of regularly admitted and specially admitted first-time freshmen

| Cohort | Campus |  |
| :---: | :---: | :---: |
| Fall 2021 first-time freshmen | Bakersfield | 1,165 |
|  | Channel Islands | 566 |
|  | Chico | 1,929 |

(4) (A) An analysis of the university's three factors that go into the multiple measures assessment of placement of freshmen into a specified level, and how predictive each of those factors is for student success indicators.
(B) For purposes of this section:
(i) The university's three factors that go into the multiple measures assessment of the placement of freshmen are:
(I) course taking, (II) grade point average, and (III) test taking.
(ii) "Student success indicators" are all of the following: (I) persistence into the fall term of the second academic year at the CSU, (II) the number of units completed at the CSU in the first academic year, and (III) grade point average at the CSU in the first academic year.

[^3](4) (A) An analysis of the university's three factors that go into the multiple measures assessment of placement of freshmen into a specified level, and how predictive each of those factors is for student success indicators.
(B) For purposes of this section:
(i) The university's three factors that go into the multiple measures assessment of the placement of freshmen are: (I) course taking, (II) grade point average, and (III) test taking.
(ii) "Student success indicators" are all of the following: (I) persistence into the fall term of the second academic year at the CSU, (II) the number of units completed at the CSU in the first academic year, and (III) grade point average at the CSU in the first academic year.

Math and Quantitative Reasoning - Systemwide level
