

EdQ DataView Program Perceptions Dashboard

Over the past several years, the Educator Quality (EdQ) Center has collaborated with educator preparation program leaders to design a data system to serve the needs of our campuses. The continued development of this system is driven by what we've heard from you—CSU educator preparation administrators, faculty, and staff—about the data you most need to support your work and continuous improvement. Our goal is to assemble information in a single easy-to-use tool so you have access to the data you need, when you need it.

TRACK THE PERCEPTIONS OF YOUR KEY STAKEHOLDERS

The Program Perceptions dashboard features data that the CSU community identified as a top priority: the perceptions of candidates, completers, and employers about our preparation programs, with data generated through EdQ Center surveys. Educator preparation faculty and staff can use this initial set of dashboards to explore overall perceptions about their own programs, to dig into how well their students were prepared to perform particular tasks or meet specific expectations, and to understand where the participants of these surveys are employed and what positions they hold.

IT'S SIMPLE TO GET STARTED

You can check out this dashboard via the EdQ Center website using your secure credentials. Wondering how to get started with the dashboards? We're here to help! Check out our Discover and Explore a Teacher Guide or contact us! We have data coaching services to help each program utilize this new tool to address its most vital learning questions and drive improvement based on its goals.

YOUR DATA IS SECURE, AND CONTROLLED BY YOUR CAMPUS

All data are secure, and each campus determines who sees their data. The EdQ Center is here to serve the specific goals and improvement priorities of individual campuses. We also support cross-campus partnerships, and will provide opt-in opportunities that each campus can consider. For example, your campus might choose to join into broader uses of the dashboard system through information sharing that can facilitate collaborative learning and innovation.

You can access the dashboard from the EdQ Center website at www2.calstate.edu/impact-of-the-csu/teacher-education/educator-quality-center.
