

Considerations on Sustainability What are the new systems your team has established via NGEI and would like to continue? (e.g. a new process for mentor teacher selection and/or support; a new candidate feedback process)

Attribute	Progress To Date	Challenges/Still to Do
<p>Ownership</p> <p>Who will own the new processes?</p> <p>Are they currently engaged and onboard with this work?</p> <p>Do job descriptions reflect these roles?</p>		
<p>Hardwiring the Change</p> <p>How will we make it hard to do the wrong thing and easy to do the right thing?</p> <p>How will we standardize?</p> <p>How can we reduce reliance on human memory?</p> <p>What documentation and resources are necessary?</p>		

<p>Training</p> <p>How will we support individuals in the new “right way”?</p> <p>How will we onboard new people to this process?</p> <p>How will we build in ongoing training supports?</p>		
<p>Communication</p> <p>How will we communicate about this work internally and externally as needed?</p> <p>Who will be the messengers?</p>		
<p>Measurement</p> <p>What measurement needs to be in place to ensure we can monitor the quality and reliability of the process/es?</p>
