# Problem

---

Students, faculty and staff are not able to **get quick answers** to basic IT services on **their schedule**.

# Goals

---

Prototype an AI chatbot as a proof of concept for key ITS services

Reduce Level 0 support questions/tickets

Explore acceptance and use of a chatbot

# What is a AI Chatbot?

An AI-powered chatbot is a smart version which uses **natural language processing (NLP)** and **machine learning (ML)** to better understand the intent of the human and provide a **more natural, near human-level communication.**

# What We Did

---

Define three main conversational pathways in Motion.ai (Password, Wi-Fi, Student Center)

Used ITS guides as the fallback for undefined pathways

# Conversational Design

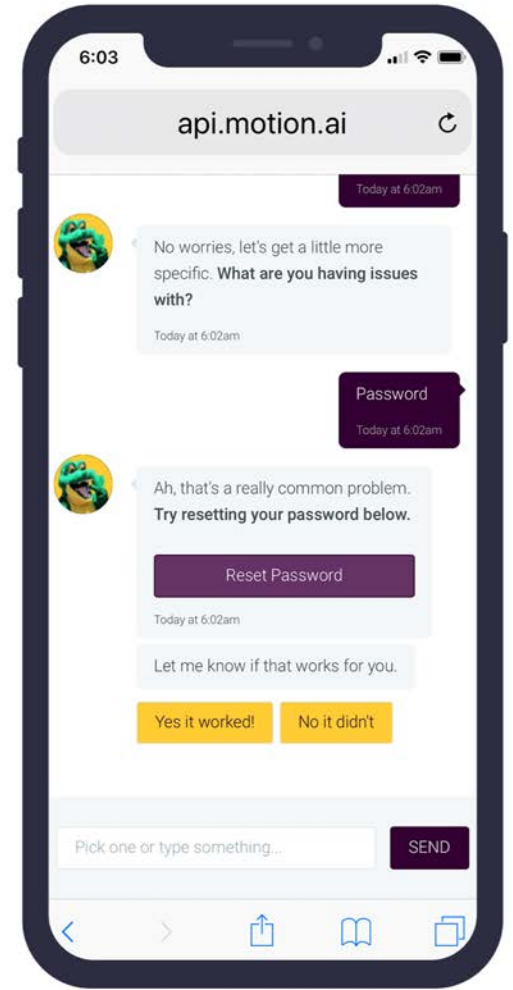

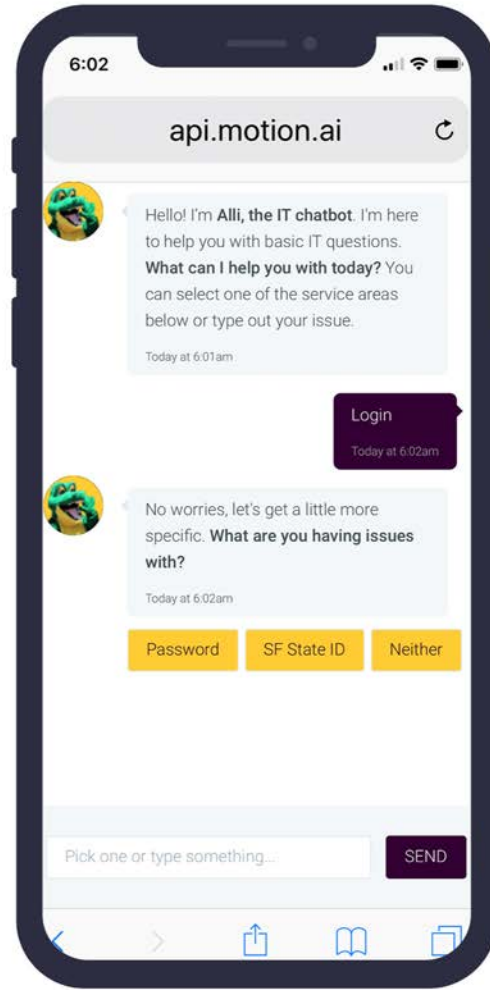

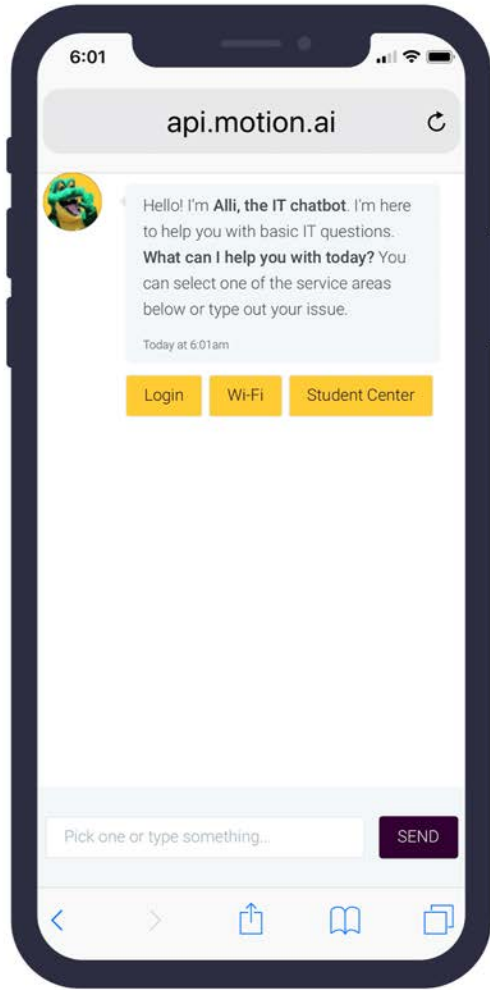

---

DESIGN PROCESS

# What is Conversational Design?

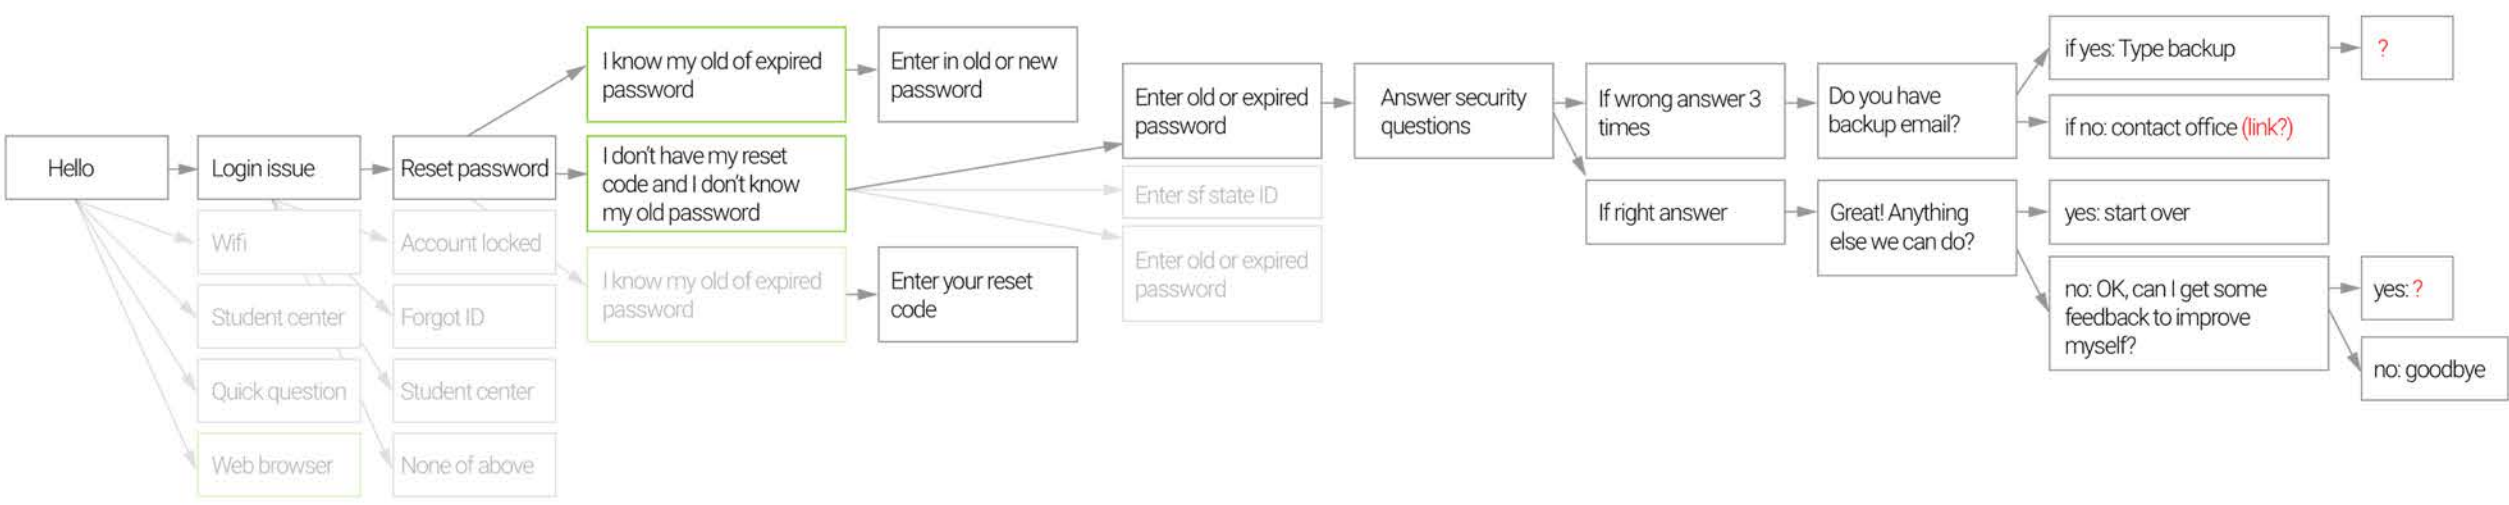

Conversation design is about the **flow** of the conversation and its **underlying logic**.
